Glymaxil—the first soluble buffer antacid—is a solution of an entirely new chemical compound, an antacid chelate. Glymaxil is presented as a clear liquid, attractive to the eye and pleasant to take. It is ideal for both short and long term therapy. Glymaxil neutralises faster and will buffer more acid in the ideal pH range of 3 to 5 than the traditional mixtures, without constipating or laxative effect.

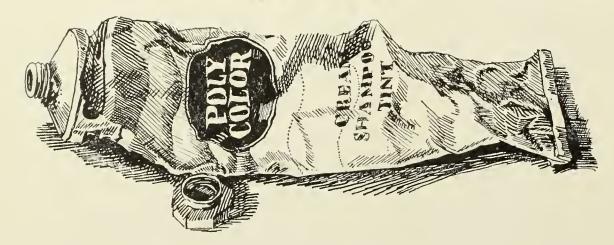

Glymaxil (sodium glucaldrate) is a product of British research at

BEECHAM RESEARCH LABORATORIES

WHY THE SQUEEZE?

Your customers have put the squeeze on POLYCOLOR. It's gone to their heads. An independent research organisation shows that in just over a year, POLYCOLOR has become the second biggest-selling hair-colourant. (Market growth 1962: May/June—0.8%; July/August—6.4%; Nov./Dec.—11.4%; 1963: May/June—15.8%.)*This is one of the greatest success stories ever for a product of this type.

Popularity like this is impossible to anticipate. Demand at present exceeds supplies. The Lambert Chemical Company apologises for any delays and inconvenience this may cause, and assures you that everything is being done to step up production, and keep your POLYCOLOR profits rolling in.

NB As from August 12, the retail price of POLYCOLOR will be 4/9 per tube. 32/8 per dozen. This means extra profits on every tube you sell. Orders received before August 12 will be invoiced at the current price. (Please order in minimum quantities of half dozen per shade.)

Cut shopfitting costs with

SHELVING

KNOWN THROUGHOUT THE WORLD

Fitting or refitting your shop with Remploy-Lundia prefabricated shelving saves you money. It needs no outside labour to assemble . . . it costs far less than custom-built installations . . . and it is remarkably adaptable.

OUTSIDE LABOUR NEEDED TO ASSEMBLE

Because of the comprehensive range of sizes, Remploy-Lundia Shelving can fit into any given wall space to within 6 inches. Each shelf is adjustable—can be moved up or down at intervals of $\frac{3}{4}$ inch.

Any combination of widths can be joined together, and extension bays are easily added to existing Remploy-Lundia units.

Made from polished hardwood in natural finish, Remploy-Lundia Shelving is smart looking as well as practical. Remploy-Lundia can cost as little as 70/- per foot by 6ft. high.

"Part Supply" on EC10's

NOT A BREACH OF SERVICE TERMS

AN appeal by a chemist against the decision of the Carlisle Executive Council that he had been in technical breach of his terms of service following a drug test at his pharmacy has been allowed by the Ministry of Health. The chemist had supplied twenty-four tablets of a branded speciality, all he had in stock, against a test prescription for forty. He had undertaken to deliver the remainder.

The Pharmaceutical Services Committee accepted without reservation the chemist's statement that he was acting in the best interest of the patient by supplying part of the order immediately, but took the view, which was endorsed by the Executive Council, that the part supply was a technical breach of his terms of service and clause 7 of part II of the Drug Tariff, which stipulates that "the exact quantity ordered by the prescriber must as a general rule be supplied and payment will be calculated accordingly." The Council therefore decided that, whilst taking no further action on this occasion, it should draw the Minister's attention to the difficulties that arise when a prescription cannot be fully dispensed owing to temporary shortage of stock. The Minister, in his reply, said he was satisfied that the chemist had acted reasonably.

Cruel Poisons

BAN ON RED SQUILL AND PHOSPHORUS

THE Home Secretary has made regulations prohibiting the putting or placing of red squill and elementary yellow

phosphorus, in or upon any land or buildings for the purpose of destroying mammals of any kind. The Animals (Cruel Poisons) Regulations, 1963 (H.M. Stationery Office, price threepence), effective October 26, also prohibit such putting or placing of strychnine, except for the purpose of destroying moles.

Chemists' Retail Trade

APRIL, MAY SALES FIGURES

RECENTLY issued Board of Trade figures show that the sales of chemists' goods by independent retailers were unchanged in April compared with March and 1 per cent. higher than in April 1962. Multiple retailers' sales were 1·1 per cent. lower in April compared with March and 3 per cent. higher than in April 1962. Sales by Co-operative societies were 2·1 per higher in April than in March and 3 per cent. higher than April 1962. In May, sales by independent retailers were 2·1 per cent. higher than in April and 1 per cent. higher compared with

May 1962. Multiple retailers' sales were 13·3 per cent. higher in May than in April and 15 per cent. higher than in May 1962. Sales by Co-operative societies were 4·2 per cent. higher in May than in April and 3 per cent. higher than in May 1962. The figures do not allow for receipts under the National Health Service.

N.H.S. Negotiations

A T.U.C. DEPUTATION ON MACHINERY

THE Minister of Labour (Mr. John Hare) received on July 16, at the request of the Trades Union Congress, a deputation about arrangements for the negotiation of pay and conditions in the National Health Service. The deputation, which consisted of Mr. G. H. Lowthian; Mr. H. Collison; and Mr. Boyfield of the T.U.C.; and Mr. C. H. Beckett (National Union of General and Municipal Workers); Mr. J. K. Dutton (The Association of Scientific Workers); Mr. A. W. Fisher (National Union of Public Employees); Mr. A. H. Akers (Confederation of Health Service Employees) and Mr. Heritage (Transport and General Workers Union), spoke on behalf of unions affiliated to the T.U.C. with members in the National Health Service. They raised with the Minister, in view of his special responsibility for industrial relations, a number of criticisms of the existing machinery, such as the composition of the management side of the Whitley Councils in the National Health Service; the requirement that agreements of the Councils should be approved by the Health Ministers and the general working of the negotiating machinery and the use of arbitration.

STUDENTS OF THE WORLD UNITE: Over 120 pharmacy students from twenty-two overseas countries arrived in London on July 29 for the ninth annual congress of the International Pharmaceutical Students' Federation, They are here shown at Brunswick Square, The congress goes on until August 8.

Biological Research

£100,000 GRANT TO IMPERIAL COLLEGE

THE largest sum yet awarded by the Department of Scientific and Industrial Research for biological research-£100,000—has been granted to the Imperial College of Science and Technology, University of London, for re-search under the direction of Professor E. B. Chain, F.R.S. (professor of biochemistry). Professor Chain's research programme will include work on microbial metabolites of scientific and industrial interest, such as ergot alkaloids, plant toxins produced by moulds, antimicrobial substances, growth factors, enzymes and coenzymes. It is hoped to develop new fermentation techniques automatic analytical control methods, with special reference to aeration and fermentation substrates and products. The grant also covers the training of four key workers in the department of chemical microbiology and general biochemistry at the *Istituto* Superiore di Sanita in Rome, which Professor Chain has been directing. Funds for building and equipping laboratories for biochemistry and chemical micro-biology at the College have been pro-vided by the University Grants Committee, aided by a generous contribution from the Isaac Wolfson Foundation.

Antibiotics in Food

REPORT OF W.H.O. EXPERT COMMITTEE

ALTHOUGH there are limitations to the non-medical uses of antibiotics if those uses are intelligently exploited, the advantages are great and the hazards few or non-existent. That opinion is expressed in a report of a World Health Organisation expert committee on the use of Antibiotics in Food and Feedstuffs (H.M. Stationery Office, price 1s. 9d.). The committee suggests that the approach should be careful and deliberate, in order that predictions of usefulness and safety based on theory can be confirmed stage by stage by practical experience. At each stage the amounts of antibiotics used and

the residues left should not be higher than are necessary to achieve the desired results under conditions of good animal husbandry and good technology. The committee believes that research might profitably be directed to the discovery or identification of further antibiotics not required for medical purposes, but suitable for use in food preservation. Other suggested research topics are:—The mode of action of low-level feeding of antibiotics; the effects of antibiotics on the intestinal flora of animals; the masking of infection at slaughter; the transmission of antibiotic-resistant bacteria from animals to man; the merits of antibiotic combinations; and assay techniques.

Employers' Organisations

MOVES TOWARDS A SINGLE UNIT

THE Federation of British Industries, the British Employers' Confederation and the National Association of British Manufacturers may form a new body to take the place of the three existing organisations. Because of the great change in the pattern of world trade, the pace of technological development and the need for the policy of economic growth the councils of the organisations believe a single strong organisation is now a constructive necessity. It is therefore proposed to commission one or more distin-guished professional personalities to draft the constitution of the new body. The governing councils of the existing organisations will then be invited to study the recommendations of the Commission, and if necessary to make such modifications as would make the proposals acceptable to them. Thereafter they will be invited to appoint committees or individuals to prepare detailed plans for setting up the new organisation and the winding up of the old organisations.

Smallpox in 1961-62

VACCINE SUPPLIES REPORTED ADEQUATE

FIVE-and-a-half million doses of small-pox vaccine were issued to the Public

NORTHERN IRELAND HEALTH SERVICES

Board's report for 1962-63

THE number of chemists providing pharmaccutical services in Northern Ireland decreased during the year ended March 31 from 643 to 640, and the number of shops fell by seven to 703. Those figures are given in the annual report of the Northern Ireland General Health Services Board for the year 1962-63. The report forecasts that the number of shops will continue to decrease over the next few years, particularly in Belfast. In the Board's view "the present high proportion of chemists' shops to population makes it difficult for some chemists to maintain adequate stocks of the very wide range of products now prescribed under the Health Service."

Prescriptions dispensed were 31,368 fewer than the previous year at 6,763,390; the gross average cost per prescription rising by 5.28d. during the year to 128.74d, as compared with a rise of 11.94d, in the previous twelve months. Just over a Id, of that rise is

accounted for by the change in the remuneration of chemists that took effect on August 1, 1962, and resulted in an added cost to the Board of £14,600 (£30,000 in a full year). The rest of the increase is attributed to the proportion of proprietary preparations prescribed and to the use of newer, and usually more expensive, preparations. The total amount received by chemists from pharmaceutical services during the year (for prescriptions dispensed February 1, 1962 to January 31, 1963) was £3,487,456, an increase of 3-65 per cent.

The Board's agents presented 108 test prescriptions of which ninety-nine were dispensed satisfactorily; of the remainder, four chemists were warned, three cases were referred to the Services Committee and in two no action was taken. The Services Committee investigated seven complaints against six chemists: in five cases a deduction from remuneration was ordered, one chemist was reprimanded and one case dismissed.

Health Laboratories (England and Wales) during six weeks of the outbreaks of the disease between December 1961 and April 1962. The Ministry of Health's report "Smallpox 1961-62" (H.M. Stationery Office, price 5s. net) shows that four-fifths of that total came from the Lister Institute, and that over one million doses were imported. 63,000 doses were supplied by a Liverpool firm, which also held the imported stock for distribution. The report states that the major epidemic reserves of the vaccine remained practically intact, and although there were occasional delays in meeting essential demands, supplies were never inadequate for essential needs.

Late Dispensing Service

MOVE BY READING EXECUTIVE COUNCIL

THE possibility of organising a late dispensing service in Reading is being explored by the Executive Council of the borough. It cruisages one in twelve chemists in the town centre remaining open 6-10 p.m. on a rota basis, the cost being defrayed by a reduction in the service at present provided in fringe areas. The Council has written to the Ministry of Health asking for approval in principle for the necessary amendment to hours-of-service arrangements.

IRISH NEWS

THE REPUBLIC

Hospital Pharmacy

ORIGINS AND PRACTICE OUTLINED

HOSPITAL pharmacists, and members of other branches of the profession, recently heard an address given in Dublin, under the auspices of the Post-graduate Committee of the Pharmaceutical Society of Ireland, by Dr. T. D. Whittet (chief pharmacist, University College Hospital, London). Dr. Whittet traced the origins of hospital pharmacists and referred to some of his own predecessors, including Davis and Martindale, and the work done by them that had made their names household words in pharmacy. He went on to describe the work carried out in a large modern hospital pharmacy. In the ensuing discussion allusions were made to the pharmacist's rôle as adviser to the hospital staff in the uses, handling and storage of drugs, and the lecturer said he had been associated with the clinical trials of a number of new drugs.

Research Grant

£25,150 FOR COLLEGE DEPARTMENT

A GRANT of £25,150, for the completion of research accommodation, has been received by the department of pharmacology, Trinity College, Dublin, from the Wellcome Trust. Present research facilities were provided by earlier grants, amounting to £6,000, from the Trust to the department, which is working on endocrinological, pharmacological and toxicological problems under Professor G. W. Pennington. The Trust has now given over £130,000 for the encouragement of science in the College.

NEWS IN BRIEF

THE Empire Rheumatism Council has voted a grant to Dr. G. Szilagyi (University Medical School, Budapest, Hungary). Dr. Szilagyi is coming to London to assist Dr. A. St. J. Dixon at St. Mary Abbots and St. Stephen's Hospitals in trials of indomethacin.

A SYMPOSIUM on "Hair" is being held at Brighton, Sussex, by the Society of Cosmetic Chemists of Great Britain, April 14-16, 1964. Anyone wishing to present a paper should contact Mr. R. E. Eckton, Givaudan & Co., Ltd., Godstone Road, Whyteleafe, Surrey.

THE Board of Trade announces that it has revoked the anti-dumping duty of £8½ per ton on phthalic anhydride produced by Reichhold Chemie, A.G., Hausen-bei-Brugg, Switzerland. Anti-dumping duties on imports of phthalic anhydride from Austria, France, West Germany and Poland continue.

PRODUCTS accepted for the Design Index of the Council of Industrial Design, 28 Haymarket, London, S.W.1, in May included a nail brush (No. 350) by Laughton & Sons, Ltd., Warstock Road, Birmingham, 14; a Paterson photographic developing tank (the Universal II) by R. F. Hunter, Ltd., 51 Gray's Inn Road, London, W.C.1; and self-illuminating and high-precision magnifiers by Verebes & Co., Ltd., 5 Bathurst Street, London, W.2.

ENTRIES for the 1964 Maccabaean prize and medal are being invited by the Faculty of the History of Medicine and Pharmacy of the Worshipful Society of Apothecaries of London, for an essay of 5,000 to 7,000 words on some aspect of the history of medicine or pharmacy. Intending candidates, who must be under thirty years of age on March 15, 1964, may apply for further particulars to the secretary of the Faculty (Dr. F. N. L. Poynter), The Wellcome Historical Medical Library, Euston Road, London, N.W.1.

SOUTH LONDON AND SURREY PHARMACISTS' GOLFING SOCIETY. Thirty-six members attended the meeting at Walton Heath golf club on July 17 when a Stableford competition was played for the Verona trophy. Results: 1, H. Reynolds (Copthorne), 38 points; 2, D. Spier (Shirley Park), 33 points; 3, F. Jamieson (Woodcote Park), 32 points, Scratch to seventeen handicap prize, R. Hedges (Langley Park), 32 points. Eighteen and over handicap prize, G. G. Watt (Croham Hurst), 28 points.

TOPICAL REFLECTIONS

By Xrayser

Away from it all

From the depths of my deckchair next Monday I shall bless that human, if nameless, benefactor of mankind who thought that bankers should have a holiday early in the month of August. The process by which that abandonment of toil on the part of those whose days are spent in balancing ledgers, in counting banknotes with an oscillating forefinger, in shovelling large quantities of loose silver, and in most politely drawing attention to the precarious state of one's financial position—the process by which that intermission for the banker became a break for the nation as a whole defies the most assiduous investigation. (It is scarcely to be thought that every man, woman and child over the countryside is in the habit of visiting the bank every day, and that the absence of the banker on the first Monday of August would paralyse the whole community.) In droves of countless millions, we seek the seaside and the deckchair and settle ourselves to the active pastime of Gilbert's Lady Angela, who enjoined her companions to "think of nothing at all." But even here we are surrounded by a large section of humanity busily engaged in plastering itself with magic potions formulated to filter the sun's rays, to protect the skin from its harmful effects, and to send the users back to the daily round looking as if they have spent a couple of months in the tropics. One hopes, as one surveys an array of blistering backs, that the unfortunate pharmacist will not be held responsible for the nights of discomfort that must follow. One also hopes, perhaps, that the keen but too amateur photographer, pointing his lens straight at the sun, will take that film to some other dealer on his return home. Better turn the deckchair round so as not to see, lest one feels called upon to offer advice that might not be well received. And, from the new angle, one is confronted with a helpful but hamfisted gentleman who has offered to fit a new spool into a camera and is now beginning to wish that he had been a little more modest about his accomplishments in that direction.

A day on the beach

There, only a short distance off, is a picnic party, with a large vacuum jug leaning at a dangerous angle on top of a rock. But it's not your jug, and refills are obtainable from the pharmacist. You see, don't you, how impossible it is to get away from it all? And behind you—and you dare not look round—two ladies are engaged in serious discussion on the subject of weights and measures, and you feel tempted to say that everything will be all right when we go over to the metric system. One of them, you gather, is having capsules from her doctor, to the envy of her companion, who has been told by her doctor that all that is required is strength of will. Meanwhile, on your other side, snatches of conversation reach you on the respective merits of various panaceas for rheumatism—the copper bangle and a piece of sulphur (held on the shoulder till it cracks) receiving strong support from their advocates. It begins to look as though there is a good deal of truth in the story of the old lady who enjoyed poor health, and the thought occurs that rota duty might have provided a cleaner break. One could then, in complete solitude, have read of the Christmas trade shows that are now beginning under blue skies in hot cities, sometimes in sumptuous surroundings.

Reflection

As I sat in the splendour of summer sunshine, I reflected topically and otherwise. Why, for example, had yet another identical preparation of meprobamate been launched? Why, when ampoules are packed in boxes of ten, does the physician order a dozen, and when the original contains twelve does he order ten? And why do some doctors direct 5 mils to be taken when they have prescribed 6 oz.? And why, if the doctor has forgotten what he gave last time and chances his hand, is it the pharmacist who has given the wrong medicine? And why the Minister of Health was called Enoch? It's pleasant to sit in the sun, away from it all, and think of nothing at all.

Statutory Committee Inquiries

ALL PHARMACISTS WARNED ON SCHEDULE 4

"IT may be that the time is rapidly passing when the excuse of negligence can continue to be accepted... it may be that the time has now come when the Committee will take the view that there is an absolute duty on a pharmacist to acquaint himself with the relevant contents of the Fourth Schedule, and when an excuse of carelessness can no longer be accepted." That warning was given by MR. J. C. LEONARD (chairman of the Statutory Committee) in announcing, at an inquiry in London on July 10, a decision of the Committee to reprimand a pharmacist who appeared before them.

The pharmacist had been convicted

The pharmacist had been convicted at a county magistrates' court on May 7 of three offences of selling Ritalin tablets to a purchaser who had not produced a medical prescription. The pharmacist had pleaded guilty and been fined a total of £60 with £10 10s. costs.

A. C. CASTLE (solicitor), who MR placed the facts before the Committee, said the case arose after Grimsby police had had trouble with Icelandic fishermen, two of whom had Ritalin tablets in their possession when arrested. Police inquiries had traced the pharmacist as the source of the tablets. He admitted he had sold Ritalin to a taxi driver, but said he thought the tablets were free from any restriction. When visited by one of the Society's inspectors, the pharmacist frankly admitted that he had supplied the tablets, and in fact produced his wholesaler's invoices showing the quantities he had bought for sale to the taxi driver. He thought the taxi driver was supplying the tablets to the Icelandic seamen to take home because they were required for medicinal purposes in Iceland, where they were not available. The pharmacist told the Committee that he had begun in business on his own account eight years ago, but that he had first sold Ritalin tablets before that. Since he began his own business he had often dispensed the tablets but had had no prescriptions for them during the past two or three years. When the taxi driver had asked for some of the tablets he examined the two tins he had in stock. There was no indication on the tins of restrictions.

The taxi driver's later purchases had been given to him by an assistant, more or less as received from the wholesaler. The pharmacist said he had never looked at the tablets, being quite sure that they were on free sale.

"A False Sense of Security"

MR. R. H. BLOOMER (solicitor acting for the pharmacist) said that his client had been lulled into a false sense of security, having in the first place looked carefully at the tins he had in stock. He asked the Committee to deal with the case on the basis of negligence. The offence had not been deliberate. It was an act of carelessness.

Announcing the Committee's decision, THE CHARMAN said there would be no direction that the pharmacist's name should be removed from the regis-

ter, because the members of the Committee were not satisfied that the offence was in any way deliberate.

"We are prepared to accept what you told us, though, in the present case, you were in fact negligent, indeed reprehensibly negligent, in not acquainting yourself with the latest state of Schedule 4B of the Poisons Rules. You were not deliberate in selling the quantities you did sell and which formed the subject of the three convictions against you."

The chairman then reprimanded the pharmacist and gave the already mentioned general warning to pharmacists to acquaint themselves with the relevant contents of the Fourth Schedule.

Breaking and Entering

On the same day the Committee considered the case of John Frederick Rowlands, 396A Huddersfield Road, Millbrook, Stalybridge, Ches, who was alleged to have feloniously broken into and entered on December 11, 1962, the shop of W. H. Evens, Ltd., 350 Worsley Road, Eccles, Lancs, and stolen £11 6s. 0½d. There was also another offence of breaking and entering the premises of National Co-operative Chemists, Ltd., 436 Flixton Road, Urmston, Lancs, and stealing £37 8s. 5d. in money, two keys and a paper coin bag, total value £37 10s. 6d. At Eccles magistrates' court on December 20, 1962, the pharmacist had pleaded guilty to each offence and had been convicted and sentenced to six months' imprisonment on each charge, making a total of twelve months. Rowlands also admitted five other cases of breaking and entering

MR. CASTLE, who placed the facts before the committee, called upon a police officer to provide details of the events that led to the convictions. Evidence was also given by Mr. J. R. Dale (an inspector of the Pharmaceutical Society) and by the pharmacist himself. After the committee had adjourned to consider the case THE CHAIR-MAN said: "We find the convictions proved, and indeed they are not in dis-The Committee knows that something like £285 in money or money's worth was stolen by you between September 1962 and December 1962, all from pharmacies. Those convictions are of a nature which render your name unfit to be kept on the register and, having listened to what Detective-sergeant Collins told us, and what you told us yourself, we feel that it would be wrong not to direct that your name should be removed from

the register. That is our decision.

However, I think in the circumstances I can properly add this. We accept, as Detective-sergeant Collins put it, that in committing the offences to which I have referred you went to some extent haywire, and were under considerable emotional stress at the time. Therefore, when I tell you that your name is to be removed from the register, I also tell you that first of all you have a right to appeal if you want to, and secondly

that, presuming the decision to remove your name from the register is not appealed against successfully, and takes effect, it will be open to you to apply at a future date to have your name restored.

I am not giving you any encouragement to apply again at an early date, but an application will of course be given the most careful consideration if you feel you want to make it. It may help you to say that, if you were able to come forward with an application supported by evidence that you had employment likely to be available to you, and that you were restored to health and able to take advantage of the situation where there was no risk of this sort of thing happening again, then that application would stand a better chance of success than one just made in the void without any firm or assured future prospect..."

Illegal Sale of Glutethimide

The next case dealt with by the Committee concerned a body corporate in respect of which it had been alleged that they illegally sold Doriden tablets on October 13 and November 10, 1962. The company was prosecuted at the North London magistrates' court and, through counsel, pleaded guilty to both offences. The company was fined £20 on each charge, £40 in all, plus £5 5s. costs. Mr. Castle said that a lady who went into the company's pharmacy and asked for some Doriden tablets was attended to by an unqualified male assistant, "quite a mature young man in his late twenties." He told her she should have a prescription. "He supplied the tablets in a box which was labelled with the company's name and the address of the premises, her name and the name of the tablets. second time the lady attended the pharmacy on the instructions of an inspector of the Pharmaceutical Society. asked a young lady assistant for twenty-five Doriden tablets. "The youngish unqualified assistant came forward, supplied them to her without question. After the second sale the inspector went into the premises, saw the pharmacist in charge and informed him of the sale without a prescription. He also mentioned the earlier sale. The pharmacist said he knew nothing about it. He had not been consulted by the unqualified assistant before the sale was made. The unqualified male assistant told the inspector that he did not know that Doriden tablets were subject to the Fourth Schedule restrictions.

THE CHAIRMAN: "Has the company written to offer any apology or explanation?" MR. CASTLE: "I understand not. I do not think any explanation was tendered by the company. . . An explanation was given to the learned stipendiary magistrate by counsel appearing on behalf of the company. That explanation was, I think, substantially as I have mentioned it. . . "MR. M. DOFFMAN, who appeared on behalf of the company, pointed out that no explanation had been asked of the com-

pany so far as the present proceedings were concerned. They commenced immediately with the inquiry, and not commenced with a letter requiring any explanation, So far as the proceedings before the magistrate were concerned, the first intimation was a letter in which Mr. Castle said he had been instructed to institute legal proceedings. As a result, a reply was sent stating it would not be right for any comment to be made save to say that no issue was joined on the fact that Doriden did contain the poison. After evidence had been given by an inspector of the Pharmaceutical Society, Mr. Doffman said he did not propose to call any evidence. "I do not think the facts are, in effect, in dispute." The Chairman: "Do exactly as you like but I am a little surprised that no one is coming from the company.

MR. DOFFMAN: "According to the regulations and the notice as I read it, did not feel that there was anything that could be added. As far as the company is concerned, I could and still can now, if it is required, bring along the superintendent pharmacist. He, of course, can merely express—as I propose to do in due course—the apologies and the concern of the company. He was not at any time physically present, or indeed in charge at the particular time as far as he personally was concerned, although of course the company must accept that responsibility.

Later, Mr. Doffman pointed out that the difficulty in which the company was placed in the matter was that, whilst clearly they had been responsible and quite properly prosecuted and convicted, there was the situation that a superintendent pharmacist and a pharmacist had been in charge. The superintendent pharmacist had not been present at any time when those transactions took place. The branch pharmacist was a person in whom the company had and retained confidence, and who was still employed by the company. They were concerned not to make any statement or admission that might appear to prejudice him.

MR. DOFFMAN asked the Committee

to accept the company's apologies and its assurance that every effort would be made to see that there was no repe-

tition of "anything like this."

"So far as the company were concerned, they felt that adequate instructions had been given with regard to the requirements, particularly of the Poisons Rules.'

Casual Treatment

THE CHAIRMAN referred to that aspect of the inquiry later when he said 'If you want to say that these people have been warned again and again and carefully told all about Doriden, then I should have thought that it was up to you to satisfy us on this, Quite frankly, I know it is no fault of yours, but it strikes me that this company is treating this matter very casually indeed.'

MR. DOFFMAN: "I would not want

you to think that at all."

THE CHAIRMAN: "We take a grave view of the sale of these Scheduled poisons, and it is being treated by the company as though it were a parking offence.

Mr. Doffman: "I would not like

you to take that attitude, and with the greatest respect I do not think that there are any facts which justify your taking that view. If you feel that there is any discourtesy, I would ask you immediately-

THE CHAIRMAN: "It is not a question

of discourtesy, it is a question of——"
MR. DOFFMAN: "If you feel that the superintendent pharmacist should be before the tribunal, I will ask you to adjourn this hearing and I will arrange for his attendance.'

THE CHAIRMAN: "Do you apply for an adjournment?"

MR. DOFFMAN: "I do apply for an adjournment. THE CHAIRMAN: "How long do you

MR. DOFFMAN: "It is a question of

the Committee's convenience."

THE CHAIRMAN: "Can he come to-

MR. DOFFMAN: "I imagine so." THE CHAIRMAN: "We will leave your application over. Perhaps you could mention the matter at 2 p.m. or 2.15.

MR. DOFFMAN: "Indeed so, I can

certainly have him here at that time.

THE CHAIRMAN: "You will consider, Mr. Doffman, whether one of the assistants may not be appropriate to your case. I do not know.

MR. DOFFMAN: "As you wish, sir."
THE CHAIRMAN: "I am not saying, but I have indicated to you. I know clients are sometimes difficult. not always that they accept their law-yer's advice. But the Committee at the moment might take the view that the company are not treating this matter with the gravity it deserves.

After an adjournment, Mr. DOFFMAN said that he had the superintendent pharmacist and the unqualified dispenser who was concerned with the sale, available to assist the Committee. After both had given evidence and had been cross-examined by Mr. Castle, the Committee retired to consider their verdict.

Decision Postponed

On resumption THE CHAIRMAN said that the offences were of a kind that would justify exercising the powers contained in Section 9 of the Act of 1933 that a body corporate should cease to be an authorised seller of poisons, and be disqualified for such periods as might be certified from being authorised to sell poisons, or secondly that any or all of the premises of the body corporate should be removed from the register of premises and disqualified for a specified period.

THE CHAIRMAN continued: Committee are much concerned at the present time with the extent to which poisons on the Fourth Schedule are being sold to the public without the necessary prescription. They regard the convictions in question in this case as being matters of grave purport. They have decided to postpone for a period of twelve months a decision whether to give either or neither of the directions to which I have referred. postpone their decision on the following conditions, which they require the body corporate to comply with. The first is that the body corporate affords reasonable facilities to the Society's inspectors, or one of them, to check the conduct of the business over the period

of twelve months, in respect of the system adopted for the proper storage, custody and issue of Schedule 4 drugs, both of part A and of part B. Is your client willing to afford those facilities, Mr. Doffman?"

MR. DOFFMAN: "Indeed he is."
THE CHAIRMAN: "Secondly, that on the resumed hearing the superintendent pharmacist shall render a report to the Committee dealing with the system as adopted over the period of twelve months in the respects which I have just mentioned. That is to say we will ask superintendent pharmacist] attend and to submit to us his report as to the system adopted by the body corporate over the period of twelve months, concerning the proper storage, custody and issue of Schedule 4 drugs, parts A and B.

In conclusion I would say we are far from satisfied that due diligence has been exercised in the past by the body corporate. Indeed, Mr. Doffman in his helpful address candidly admitted that there had been negligence. It is to the interests, as I am sure the superintendent will realise, of the body corporate, as of all pharmacists, that the best possible system should be adopted, and that no precautions should be omitted which may help to secure the purposes which Parliament has announced in the legislation which govern these matters, namely that drugs which are in any way dangerous or habit-forming, or which for any other reason the public ought to be prevented from buying without control, do not come into the public's hands without the control which Parliament has envisaged."

LEGAL REPORTS

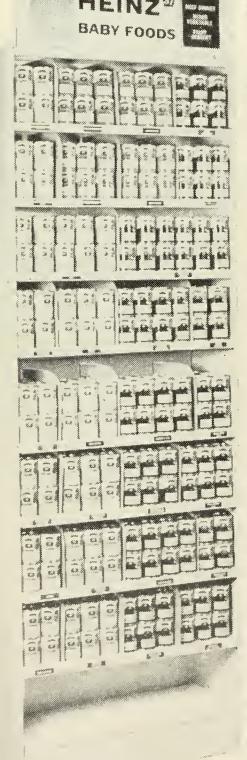

Unlawful Possession of Cannabis

AT Glasgow sheriff court, on July 18, an Indian cafe owner, Yead Ali, Blackburn Street, Glasgow, admitted being in unlawful possession of a quantity of Indian hemp and was sent to prison for eighteen months. The fiscal told the court that, although there was no legitimate market for the material, the amount of hemp found could be sold for more than £1,000. Passing sentence the sheriff reminded the accused that the penalty could be £1,000 and ten years' jail. "Trafficking in drugs of this ' he said, " results in the destruction and degradation of human beings, with the most appalling consequences.

Perpetual Injunction

In the High Court, London, on July 24, China Craft (South Shields), Frederick Street, South Shields, submitted to a perpetual injunction re-straining them from selling the products of Sterling-Winthrop Group, Ltd., pharmaceutical manufacturers, below list prices. Mr. H. Hart, for Messrs. Sterling-Winthrop, told Mr. Justice Buckley that in 1962 his clients had learned that China Craft, who had a number of shops in South Shields, were retailing their products, particularly Andrews liver salts, below the prescribed prices. In January 1963 they were granted an interlocutory injunction. Messrs. China Craft were now consenting to a perpetual order and would pay costs. Messrs. Sterling-Winthrop had agreed to abandon their claim for damages.

Heinz offer this Baby Foods selling unit for only £3 with any order for 30 varieties of Heinz Baby Foods

COMPANY NEWS

Previous year's figures in parentheses

ILFORD, LTD. — An interim dividend of 5 per cent. for the year ending October 31 is declared.

MOORE MEDICINAL PRODUCTS, LTD.—Mr. Victor C. Sang has been appointed managing director following the death of Mr. T. Scott Sutherland.

FISONS, LTD.—Mr. H. P. P. Hodgkins (chairman, Benger Laboratories, Ltd., Genatosan, Ltd., and a number of other subsidiaries) has been elected to the board of the parent company.

VITAMINS, LTD. — Net profit for year ended March 31 is £181,245 (£160,494), after estimated tax of £251,250 (£214,375). The company's properties have been revalued and a surplus of £226,612 is being added to capital reserve. There is no intention of capitalising this sum at present. Ordinary dividend recommended is 12½ per cent. (same).

ABBOTT LABORATORIES and G. D. SEARLE & CO.—A report from New York states that Abbott Laboratories and G. D. Searle and Co. plan a consolidation or merger. Both companies approved terms for exchanging stock, but the conclusion of the transaction, which may require several months is subject to negotiation of a "definitive agreement" to be approved by directors and stockholders of both companies.

Winding-up Order

MR. Justice Plowman, in the Chancery division, London, on July 29 made an order for the compulsory winding-up of Flair (Chelmsford), Ltd., retailers of proprietary drugs, of Ongar Road, Writtle, Essex, on the petition of Max Factor Hollywood & London (Sales), Ltd., creditors for £174. Mr. John Waite, for the petitioners, said that they were judgment creditors for £109 as well as trade creditors for £65. He also appeared for eight supporting creditors whose debts totalled £220.

Bankruptcy

AT Ashton-under-Lyne bankruptcy court recently Mr. William Curtis Nicholson, M.P.S., Stanhope Road, Audenshaw, Lancs, admitted a deficiency of £409 and blamed his failure on a fire which had destroyed his business premises and stock. He told the assistant official receiver that after working as an industrial chemist he bought his own retail business in Droylsden Road, Audenshaw. He offered to pay £20 a month until his debts were cleared off. The examination was closed.

BUSINESS CHANGES

LONDON CO-OPERATIVE CHE-MISTS, LTD., have opened a branch at 7 Station Road, Harold Wood, Essex.

MR. T. McKINSTERY, M.P.S., D.Opt., removed to 8 Main Street, Stewarton, Ayrshire (from 25 Lainshaw Street) on July 29.

MR. T. HUTCHISON, M.P.S., has acquired the pharmacy of W. S. Taylor, 15 Market Place, Inverurie, Aberdeens. He will continue to trade under the name of W. S. Taylor.

LEWIS & BURROWS, LTD., have transferred their executive offices to 208 Edgware Road, London, W.2 (telephone: Paddington 8463). The registered office remains at 197 Lyham Road, London, S.W.2.

Appointments

REXALL DRUG CO., Loughborough, have appointed Mr. G. Knight, advertising manager, Rexall international division.

MAYBORN PRODUCTS, LTD., 139 Sydenham Road, London, S.E.26, have appointed Mr. A. F. Moore to be in control of Dylon sales in Lancashire and North Wales.

SMITH KLINE & FRENCH LAB-ORATORIES, LTD., Welwyn Garden City, have appointed Dr. G. E. Paget their director of research and development. Dr. Paget is at present head of the section of pathology, Imperial Chemical Industries, Ltd., pharmaceuticals division, and will take up his new appointment on December 2.

PERSONALITIES

MR. A. HERZKA, B.Sc., F.R.I.C., has been elected vice-president of the Society of Cosmetic Chemists of Great Britain.

MISS MARGARET HAMPSHIRE, daughter of the late Dr. C. H. Hampshire (a former secretary of the British Pharmacopæia Commission) has been appointed principal of Cheltenham Ladies' College from September 1964. Miss Hampshire, who is a member of the board of Governors of University College Hospital, where her father was chief pharmacist from 1914 to 1929, has been since 1951 with the Courtaulds Group, of whose Government-relations department she is the present head. Her new post is her first academic appointment, though she gained an honours degree in the historical tripos at Girton College, Cambridge, after an earlier education at Malvern Girls' College.

MARRIAGES

CURRIE—SNAPE. — At Sherborne Abbey, Sherborne, Dorset, on July 20. Michael John Currie, M.P.S., 3 Fairfax Road, Chiswick, London, W.4, to Angela Janet Snape, S.R.N., Sherborne.

DEATHS

AMESS. — On July 19, Mr. Jack Amess, M.P.S., 223 Park Road, Uxbridge, Middlesex. Mr. Amess qualified in 1929 and was manager for Boots, Ltd., branch at Uxbridge. He was the employee representative on the Middlesex Pharmaceutical Committee from 1954 until March 1963.

BATT. — On July 14, Mr. Arthur Charles Batt, M.P.S., Belmont, Rose Vale, Hoddesdon, Herts. Mr. Batt qualified in 1924.

LEHR. — On July 2, Mr. Richard Lehr, managing director of Wynmouth Lehr & Co., Ltd., 2 Thames House, Queen Street Place, London, E.C.4.

MICHIE.—On July 18, Mr, Charles Alexander Michie, M.P.S., 231 Union Street, Aberdeen. Mr, Michie qualified in 1913, He was a member of the Pharmaceutical General Council (Scotland) and the Pharmaceutical Standing Committee (Scotland), 1948-55.

MILLER.—On July 13, Mr. Christopher William Miller, M.P.S., 12 Longwood Parade, Longwood Gardens, Ilford, Essex. Mr. Miller qualified in 1925.

SUTHERLAND.—On June 13, Mr. Thomas Scott Sutherland, managing director, Moore Medical Products, Ltd., Aberdeen. Mr. Sutherland was an architect, with a wide range of commercial and other interests. He had been described as a man of boundless energy with a vivacious approach to life, who enjoyed company and was a gifted raconteur. He overcame the physical disability of losing a leg in a childhood accident, and had travelled widely.

IN PARLIAMENT

By a Member of the Press Gallery, House of Commons

A NUMBER of questioners were given a written answer on July 25, when MR. JOHN BOYD-CARPENTER (Chief Secretary, Treasury) indicated that representations had been received about the effects on the black currant growing industry of the 15 per cent, purchase tax on black-currant syrup. The situation was being urgently and carefully considered, but he was not yet in a position to make a statement.

Saccharose

MR. W. Hamilton asked "for what purposes sugar saccharose or saccharose bacteriological are supplied to hospitals; whether any specification has to be met; what checks against specification are normally carried out by hospitals; and what is the current cost per pound..." MR. BERNARD BRAINE in a written answer on July 29 replied: "Principally for bacteriological cultures. There are British Pharmacopæia specifications for some types. I have no information as to checks. The price varies with type and quantity ordered."

Penicillin Injections

MR. James Callaghan asked the Minister of Health what research was taking place into means to alleviate the pain caused by penicillin injections, and when he anticipated that less painful methods would be discovered. MR. Bernard Braine (joint Parliamentary Secretary, Ministry of Health) in a written reply on July 29 said he was advised that painless penicillin injections were already available.

Cyclizine Hydrochloride

MR. M. EDELMAN asked the Minister of Health if he was aware that a proprietary drug based on cyclizine hydrochloride was being marketed without prescription as a remedy for travel sickness, and in view of the fact that the drug was capable of producing teratogenic side effects among pregnant patients, what action he was taking to make the drug available only on prescriptions. MR. ENOCH POWELL, in a written answer on July 29, said "Yes: it is under consideration by the Poisons Board."

PUBLIC ACCOUNTS COMMITTEE

Changes recommended in pricing scheme

CONCERN at the continuous risc in the cost of prescribing and the high proportion of the cost represented by proprietary preparations is expressed by the Committee of Public Accounts in its third report, session 1962-63 (H.M. Stationery Office, price 3s.). The Committee recommends that, when the voluntary price-regulation scheme comes up for review, the Ministry of Health should press for regular disclosure by all manufacturers of their promotion expenditure in relation to sales.

The Committee expressed the view that the National Health Service, as the main purchaser of drugs, bears in the cost of those drugs the bulk of the sales-promotion expenditure incurred by drug manufacturers, part of that expenditure being incurred in promoting the sale of proprietary preparations within the service in competition not only with similar proprietary prepara-tions but with unbranded standard equivalents frequently available at lower prices. Advertising and salespromotion costs amounting to £6½ millions represented 9.78 per cent, of the £67 millions total sales of the drug manufacturers in 1961. "It is apparent," says the Committee, "that the Ministry's efforts to get those excessive costs reduced have ineffective. heen Although the expenditure was, no doubt, commercially sound from the point of view of the manufacturer, it might involve a twofold extra charge to the Health Service, first for the sales promotion expenditure itself, and secondly for the excess of the cost of the proprietary preparation over the cost of unbranded standard equivalents.

Under Which Criterion?

Reference is made in the report to a proprietary preparation with a National Health Service usage of nearly £500,000 a year that became subject to the price determination provisions of the scheme in March 1959 and fell to be dealt with under criterion Al (export price). After slight reductions in March and October 1961, the price of the product was still about three times the price of unbranded preparations stated to be the exact equivalent. In September 1961 and again in July 1962 the Ministry approached the manufacturers, who pointed out that the product fell within criterion A1 and the price must therefore, under the scheme, be regarded as satisfactory. They also suggested that there was no basis for applying criterion A2 (price of the unbranded standard equivalent) because, though the preparation appeared in the British National Formulary, official standards for it had not been published in the British Pharmacopæia or British Pharmaceutical Codex, and there was therefore no official standard equivalent. The company claimed that the price was in any case fair and reasonable in relation to their costs and to the quality of the product, which contributed largely to their substantial research effort. The Ministry informed the Public Accounts Committee that, although not bound to do so under the voluntary price-regulation scheme because the

price of the drug was protected by the export criterion, the manufacturers had agreed to reconsider the price when an official standard was published. The Public Accounts Committee recommends that, when the scheme is reviewed, the Ministry should amend it so that criterion A2 (price of the unbranded standard equivalent) takes precedence over criterion A1 (export price).

The report refers to protracted negotiations with the British subsidiaries of four Swiss companies, Profit figures for 1959 and 1960 showed that one company was still incurring losses and another making only moderate profits

Reluctance to Implement Arrangements

Accounts for the other two showed a rising trend in profits that was confirmed by figures for later years. From one of the companies the Committee inferred that the Ministry obtained a price reduction on one drug producing an estimated saving to the Health Service of £129,000 a year. The Ministry is meeting the company again to see what further reduction can be obtained. It is clear, adds the Committee, that two of the Swiss companies have been reluctant to implement special price arrangements designed to meet their particular circumstances and to which they had agreed. The Committee recommends that the Ministry should discuss with the pharmaceutical industry the implications of failure by members of the industry, whether or not they subscribe formally to the terms of the price-regulation scheme, to co-operate in the negotiation of fair and reasonable prices for proprietary prepara-

The number of prescriptions fell from 214 millions in 1960 to 226 millions in 1961. Their total cost increased from £88 millions to £92 millions and the average cost per prescription in-

creased by 12 per cent, from 7s, $3\frac{3}{4}$ d. to 8s, $2\frac{1}{4}$ d.

The Ministry had informed the Committee that an analysis of prescriptions dispensed in England and Wales in the second half of 1961 suggested a potential saving in ingredient cost of about £800,000 a year if unbranded equivalents had been prescribed instead of proprietary preparations. Five proprietary preparations that were prescribed much more frequently than their unbranded equivalents accounted about two-thirds of that potential saving. The effect of the general promulgation of advice by the Standing Joint Committee on the Classification of Proprietary Preparations had been, said the Ministry, disappointing. Other methods of bringing to doctors' attention the savings to be achieved by prescribing unbranded equivalents of proprietary preparations were being considered. The Ministry had considered that better results might be obtained by concentrating on a few drugs offering large potential savings — for example, on five that accounted for possible savings of about £600,000 a year.

The Ministry also reported wide variations from area to area in the cost and frequency of prescribing. A number of studies to explain the variations had so far proved disappointing.

Campaign for Unbranded Equivalents

The Committee's comment is:—"We are concerned to note the continuous rise in the cost of prescribing and the high proportion of the cost represented by proprietary preparations, and that steps taken to check this rise are having such little effect. . . Little seems to have been learnt from the statistics about the wide variations in cost between one area and another. Some success seems to have been achieved in Glasgow by an intensive examination of a limited area, and we therefore recommend an extension of this Scottish experiment to other high-cost areas. We also urge the departments to continue their campaign to promote the widest possible use of unbranded equivalents.

N.H.S. IN SCOTLAND

Report for 1962

TOTAL gross cost of the National Health Service in Scotland in the year to March 31, 1962, was £96,561,000. The Scottish Home and Health Department's report "Health and Welfare Services in Scotland, 1962" (H.M. Stationery Office, price 5s. 6d.), shows that the pharmaceutical services were responsible for about 10 per cent, of that total. Costs of the hospital, specialist and ancillary services amounted to 63 per cent. (£60,708,000), 1,602 pharmacies were in contract with Executive Councils, Councils, contract against 1,632 a year earlier. 20.68 million prescriptions were dispensed (20.97 millions in 1961), and the average cost of prescriptions was 9s. 5d., against 8s. 10d., and the rise of sevenpence, the report states, "reflected the continuing increase in the use of costly new drugs and also . . . the increased prescription charge . . . which leads to the prescribing of larger quantities at a time. Gross cost of the Pharmaceutical Services was £10·111 millions, against £9·591 millions in 1961. After allowing

for the yield from charges, the net cost was £7.798 millions, against £7.645 millions in 1961. Of the gross cost £6.55 millions represented cost of drugs and £3.561 millions pharmacists' remuneration. Refunds made by the National Assistance Board totalled £215,200. A complaint against a contractor had been referred to the National Health Service Tribunal and the hearing was not yet concluded. There was a marked fall in consumption of vitamin-supplement preparations.

Health-centre Prescriptions

The report states that the Sighthill health centre pharmacy dispensed over 23,000 prescriptions and continued to provide a local sterile-syringe service.

The number of doctors providing general medical services as principals in the National Health Service was 2,684, and the average number of patients on each principal's list was 1,992. About 80 per cent, of doctors had fewer than 2,500 names on their lists. Remunera-

tion of general practitioners was unchanged during the year, the central remuneration pool remaining at a figure sufficient to provide an average net professional income of £2,425 for all practitioners substantially engaged in the service. The cost of the Hospital and Specialist Services, excluding capital expenditure, was £56,842,000. A breakdown showing how each £1 was spent is included in the report. Wages and salaries amounted to 12s. 5d.; administrative costs to elevenpence; fuel, light and power to one shilling; drugs, dressings, instruments, x-ray and laboratory

supplies to 1s. 6d.; ancillary services and miscellaneous expenditure to 1s. 5d.; and food for patients and staff to 1s. 8d.

Under the heading "Staffing of the Health Service" it is disclosed that hospitals employed 194 pharmacists. The information in table 2 is taken from an appendix to the report.

Fifty Years of Tropical Research

GOLDEN JUBILEE OF WELLCOME LABORATORIES

AN exhibition specially put on for an evening meeting of the Royal Society of Tropical Medicine in London on July 25 commemorates an important event in the annals of tropical medicine. It showed, in photographs, diagrams, plans, drawings and books, the achievements of the Wellcome Laboratories of Tropical Medicine during the fifty years since they were founded in Henrietta Street, W.1, as the Wellcome Bureau of Scientific Research.

Contributions to Science

During that period the name, the location and the orientation of the institution have changed more than once, but the value of its contributions to scientific knowledge and the improvement of health in tropical regions continues to grow. Portraits of many of the outstanding figures who have been associated with it — more than one to become a Fellow of the Royal Society —are included in the exhibition.

The titlepieces to some of the screens (Entomology, Helminthology, Biochemistry) name only some of the scientific disciplines in which research has

been pursued. During the first ten years the emphasis was on study of the conditions in which tropical diseases flourished. In that decade the director was Andrew Balfour, who since 1902 had been associated with Sir Henry Wellcome's pioneering efforts in the Sudan, among them the setting up of Wellcome Research Laboratories at the Gordon Memorial College and journeys up the Nile to study patients and insect vectors. Research at Henrietta Street was mainly into aspects of disease and zoology. In 1923 Balfour became Director of the London School of Tropical Medicine, and under his successor, C. M. Wenyon, the emphasis shifted to pathology, bacteriology, protozoology, helminthology and entomology. From 1926 to 1932 the laboratories were at Endsleigh Gardens, and since 1932 have been at the Wellcome Building in Euston Road.

Two Paths of Research

At all times basic research and the screening of products have been given parallel prominence. Published papers by workers in the laboratories have

averaged nearly a score a year during the half-century, and medicinal specialities that owe their origin to the laboratories include the antimonials Neostam and Pentostam in the treatment of leishmaniasis, and Triostam and Nilodin (lucanthone) for schistosomiasis, sulphetrone for leprosy, Daraprim (pyrimethamine) for malaria prophylaxis and treatment, Antepar against threadworm and roundworm and Alcopar (bephenium) against hookworm. Work is currently in progress on new antiviral agents.

After its one-night stand in London the exhibition is being taken to Rio de Janeiro, Brazil, to be shown during the seventh international congresses on tropical medicines and on malaria in September. It will afterwards return to London where two model exhibits will extend its half-century both backwards and forwards—backwards in a model of the floating laboratory of the Nile expeditions of 1906 and 1907, forwards in a model of new and larger tropical research laboratories soon to be erected at Beckenham.

The present director (Mr. L. G. Goodwin, M.B., B.S., B.Sc., B.Pharm.) is leaving within a few months to take up his appointment as first director of the Nuffield Institute of Comparative Medicine. His successor at the Wellcome Laboratories of Tropical Medicine is Mr. O. D. Standen, D.Sc., M.Sc.

N.H.S. STATISTICS

In Surrey during 1962 5,616,378 prescriptions were dispensed at a total cost of £2,614,831, an average cost per prescription of 111.74d.

In HULL, during 1962-63, 1,530,394 prescriptions (1,010,686 forms) were dispensed at a cost of £672,054. Rota fees amounted to £3,498.

In Surrey during January 524,583 prescriptions were dispensed at a total cost of £246,484, an average total cost per prescription of 112.77d. During February 605,298 prescriptions were dispensed at a cost of £269,045.

Collecting snails for infection with Schistosoma mansoni, Part of the current research work of the Wellcome Laboratories of Tropical Medicine.

PHOTOGRAPHIC NOTES

Now in Twelve-exposure Cassettes. —Kodak, Ltd., Kingsway, London, W.C.2, have introduced a twelve-exposure cassette of 35-mm. Kodacolor-X film, which it is thought will prove popular as a handy week-end pack.

Two New Tripods.—Neville Brown & Co., Ltd., 93 New Cavendish Street, London, W.1, have introduced two new tripods—the Excelsior SL/13, designed for long life and rigidity, and the TR/1201 Mopro, designed for maximum portability. The Excelsior SL/13 features a 7 in. pan-and-tilt head, large platform, spirit level, ribbed plastic-covered legs and rubber-tipped feet. Extended it is 61 in, high, and closed, 21 in. The pan-and-tilt head is graduated with a scale for easy setting. The TR/1201 Mopro is a lightweight tripod with an eight-section body that enables it to close to only $10\frac{1}{2}$ in. (maximum height being 50 in.). Complete with pan-and-tilt head and geared centre column, the tripod comes in a zip case.

Three-way Filming Control.—The Japanese Konica 8E, recently introduced by Pullin Optical Co., Ltd., Ellis House, Aintree Road, Perivale, Middlesex, is a fully automatic, electric 8-mm. cinc camera. Supplied with a Hexanon f/1.4 12-mm. five-element fixed-focus lens and built-in ultra-violet filter, the Konica 8E can be additionally fitted with a zoom-converter lens giving a with a zoom-converter lens giving a focal range of 9-28 mm. Aperture is automatically controlled by a built-in exposure meter, operated by a cadmium sulphide photocell. The motor is powered by four penlight batteries. A single loading is said to operate about 500 ft. of film. Shutter speed is fixed at sixteen frames per second. The fixed at sixteen frames per second. The footage counter is in fect and self resetting. A feature of the A.S.A. set-ting ring (fitted round the electric eye) is compensation settings for bright and dark backgrounds. Fitted with a tripod socket, the Konica 8E may also be supplied with a plastic trigger grip incorporating a shutter button in the handle. Housed in the grip is 10 ft. of flex which, when plugged in at rear of camera, gives remote control.

TRADE NOTES

Change of Distributor. — Samoore, Ltd., 26 Lawrence Road, London, N.15, have taken over from the Crookes Laboratories, Ltd., the distribution of Trophysan nutritional infusion solution containing essential amino acids.

Prescription Pack Change.—William R. Warner & Co., Ltd., Eastleigh, Hants, announce that, in response to demand for a larger pack of Gelusil Lac sachets, the 200-gm. tin has been replaced as dispensing pack by a box of 100 sachets.

Bonus for Holiday Customers.— Robinson & Sons, Ltd., Wheat Bridge Mills, Chesterfield, Derbys, are offering Paddi garments to customers at 2s, to 2s. 6d. off list price and of Paddi-Pilch at 1s. off list price between July 29 and August 24.

Application for Credit.—Pharmethicals (London), Ltd., Victoria Way, Burgess Hill, Sussex, state that claims for credit on stocks of Anovlar held on July 22, when the product was reduced in price, should be made to the wholesaler from whom the goods were obtained. Wholesalers will be reimbursed by the company.

Bank Holiday Arrangements. — Imperial Chemical Industries, Ltd., pharmaceuticals division, Fulshaw Hall, Wilmslow, Ches, state that their Scot-Hall, tish regional sales office is remaining open on August Bank-holiday Monday, and that a skeleton staff to deal with urgent orders will be on duty at the Midland regional sales office on Saturday, August 3.

Orders by Telephone.—The Crookes Laboratories, Ltd., Park Royal, London, N.W.10, have installed the Robophone telephone answering system and customers may now telephone orders or inquiries after office hours or during weekends and public holidays for attention immediately the offices reopen. The telephone number is Elgar 6317. The apparatus may also be used during normal business hours when the company's switchboard is overloaded.

A Replacement.—FBA Pharmaceuticals, Ltd., Burrell Road, Haywards Heath, Sussex, state that, when present stocks are exhausted, their Cytostatic E-39 soluble ampoules (Inproquone) are being withdrawn. A new cytostatic agent Trenimon (2,3,5-trisethyleneimino 1.4-benzoquinone) is now available, replacing the older product. The packs are a box of five 0.2-mgm, ampoules and a box of thirty 0.5-mgm. capsules.

Manufacture and Distribution Change. —J. F. Macfarlan & Co., Ltd., 109 Abbeyhill, Edinburgh, 8, announce that, following the integration of the company into the Glaxo Group, orders for Macfarlan ligatures and sutures should, from August 1, be sent to Allen & Hanburys (Surgical Engineering), Ltd., Bethnal Green, London, E.2. Messrs. A. & H. are arranging to manufacture and stock certain selected items from the Macfarlan list, in addition to their own wide range.

Agency for a Spanish Company.— M. & R. Norton, Ltd., 9 Park Hill, London, S.W.4, have been appointed agents for the old-established Spanish soap makers of La Toja, and will shortly have available that company's Magno soap containing lanolin, glycerin blended oils, and the La Toja mineralsprings water scented with the Magno fragrance. The soap is being imported from Isla de Latoja, Pontevedra, Spain, in which the factory is situated. It will be available in toilet and bath sizes.

Discontinued. — ANDRE PHILIPPE, LTD., 71 Gowan Avenue, London, S.W.6, state that their shaving soap no. 106 has been withdrawn.—RIKER LADORATIONES (o. division of Victoria) LABORATORIES (a division of Vantorex, Ltd.), Loughborough, Leics, have deleted from their list Rikospray benzocaine in 6-oz. canister and hospital pack of three canisters with handle. Wholesalers wishing to return the balance of stock for credit may do so. Other Rikospray topical aerosol products continue to be marketed. — WILLIAM R. WARNER & Co., LTD., Eastleigh, Hants, announce that Pacatal elixir has been discontinued. Credit is being given for stock returned by wholesalers before September 1.

EXAMINATION RESULTS

Successful two-year course candidates

IN the Pharmaceutical Chemist Qualifying examination (two-year course) held in England and Wales during July, the following candidates satisfied the examiners († indicates certificates withheld pending evidence of practical training):

ABDULLAH, M. D. Marylebone

†ALLCOCK, Patricia C. D., Cardiff

ATKINSON, R. M., West Kirby

BAIN, R., Whitley Bay

BAKER, P., Leeds
BERGMAN, L., Salford
†BEYNON, C. B., Llandilo BLACKMORE, A. G., Welling

†CARRASCO, T. Z., West Ketnsington

COLEMAN, H. C. B., Cardiff

†DAVIES, J. E., Talgarreg EAGLES, J. C., Reigate †HEATH, Anne, Grantham HOYLE, D. W., Stockport †HUGHES, P., Hassocks †HUGHES, R. I., Rhos-on-Sea

JARRETT, K. J., Gillingham †Jones, Eirlys, Caerleon †Jones, Pamela, Hoylake

KENNETT, Valerie, Brighton

L1 SAW-HEE, A. K., Holborn

MARSHALL, D. V., Nottingham

Holloway Moss, C., Prestwich

Heath WILLIAMS, D. G., †Mawji, S. M., Upper Llandillo WOOLLEY, W. I., Blackburn Osunsedo, E. O., Wandsworth

PATEL, D. M., Charing Cross PATEL, N. N., Highbury Poole, A. S., Birkenhead

QUINN, D. M., Acton RAO, N. V., Madras ROBINSON, Pamela D.,

Derby †Smith, Judith A.,

Poynton THOMAS, E. C., Exeter Thomas, 1. L., Hockley

†ZEFFERT, M. P., Liverpool Zys, L. F., Camberwell

Results at part III of the three-year course will be published later.

Christmas Showrooms

THE following have been notified: H. BRONNLEY & Co., LTD., North British Hotel, EDINBURGH, August 12-15.

COTY (ENGLAND), LTD., Station Hotel, ABER-DEEN, August 5-7; North British Hotel, EDINBURGH, August 12-15.

J. GROSSMITH & SONS, LTD., North British Hotel, EDINBURGH, August 12-16.

HELENA RUBINSTEIN, LTD., St. Enochs Hotel, GLASGOW, August 12-16.

MORNY, LTD., North British Hotel, EDIN-BURGH, 12-15; Polygon Hotel, SOUTHAMP-TON, August 12-15.

ROBERTS WINDSOR, LTD., Polygon Hotel, SOUTHAMPTON, August 13-15.

Bonus Offers

ROBINSON & SONS, LTD., Wheat Bridge Mills, Chesterfield. Paddi garments. Special discount of 5-10 per cent., July 29 to August 24.

NEW PRODUCTS AND PACKS

Tablets. Lederle Haematinic Laboratories division of Cyanamid of Great Britain, Ltd., Bush House, Aldwych, London, W.C.2, announce the introduction of a new speciality Ferro-Mandets haematinic tablets, Lederle. The tablets, which are chewable, have a mixed fruit flavour. Each contains 60 mgm. of ferrous fumarate (supplying 20 per cent, of elemental iron) with 50 mgm. of ascorbic acid to enhance absorption. Among the advantages claimed for the preparation are that it presents no swallowing difficulties and that there are no failures of disintegration. Ferro-Mandets are claimed to reduce gastric irritation by avoiding the high local iron concentrations that may sometimes occur with conventional tablets. The bottle holds sixty tablets.

Influenza Virus Vaccine. — A new oil-adjuvant influenza virus vaccine, Flugen-E, developed by the Wright-Fleming Institute, is now being distributed by the agents, Beecham Research Laboratories, Ltd., Brentford, Middlesex. A high degree of antigenic activity is, it is stated, achieved by the adjuvant effect of incorporating inactivated influenza viruses in a water-in-mineraloil emulsion. With its dose of only 0.25 mils, Flugen-E is understood to confer immunity for at least twelve months, and to produce a satisfactory antibody response in over 90 per cent. of cases. It is given by intramuscular injection, and the side effects are claimed less than with traditional saline vaccines. Each 0.25-mil dose contains inactivated virus A2/Singapore/1/57 (2,000 haemagglutinating units), B/England/939/59 (1,000 h.u.), B/Taiwan/4/62 (500 h.u.). The product, which becomes available early in September, is packed in box of ten single-dose glass syringes.

A New Agricultural Antibiotic.—A newantibiotic discovered by the research unit at Sefton Park, Stoke Poges, Bucks, of Glaxo Laboratories, Ltd., Greenford, Middlesex, is now undergoing further

Applying the antibiotic to a plant,

evaluation by the Sefton Park staff and by research workers at the company's associate Murphy Chemical Co., Wheathampstead, Herts. Known as venturicidin, the antibiotic has been shown to have high activity against *Venturia in*aequalis, the mould responsible for apple scab. Venturicidin was discovered in 1957-58 during the screening of about 8,000 soil samples for antifungal antibiotics that might control apple scab at doses lower than those used for conventional organic fungicides. A pure compound was eventually isolated by Dr. B. Boothroyd. Under tests at the Sefton Park unit's biology department, it was established that venturicidin was not injurious to plants, and had high activity against a number of plant pathogenic fungi, especially apple scab. The Murphy research staff were able to show that the antibiotic protected against broad bean rust at low concentrations. Other trials showed that ven-

turicidin was non-toxic to mice and dogs when given orally. Field trials against apple scab in commercial orchards, begun in 1961 by Messrs. Murphy, are continuing with material produced at the Glaxo factories at Barnard Castle, co. Durham, and Ulverston, Lancs.

Lipstick "at Refill Price."—Lancome

Lipstick "at Refill Price."—Lancome (England), Ltd., 14 Grosvenor Street, London, W.1, have introduced a new lipstick which they claim is "a lipstick at a refill price," replacing the company's Cartouche lipstick. The container is a corrugated white metal cylinder on gilt base.

A CENTURY OF OUTSTANDING PROGRESS

The story of Farbenfabriken Bayer, A.G.

ONE hundred years ago, on August 1, the German chemical concern of Farbenfabriken Bayer, A.G., was born. Employing today 78,000 people, the undertaking was started in a small house in Barmen, Wuppertal, by Friedrich Bayer, a dyestuffs merchant, and Johann Friedrich Weskott, a master dyer. A dynamic pair, they began expanding overseas as early as 1864 with dyestuffs exports and in 1865 with the building of an aniline dyestuffs plant at Albany, U.S.A. A dyestuffs intermediate started the pharmaceutical department, In 1888 the production of phenacetin was commenced and at the turn of the century the still popular aspirin was produced. From that small beginning sprang the chain of products, which include the sulphonamides, barbiturates, synthetic antimalarials, etc., which have made the group famous throughout the world.

A patent for synthetic rubber was granted as long ago as 1909, and the great bulk of synthetic rubber varieties in use today can be retraced to the company's patents. Cameras were the next venture. The Agfa factory in Munich was acquired after the 1914-18 war, and colour-transparency and colour print processes and the first fully automatic camera were developed there.

The manufacture of inorganic pesticides began in 1892. Organo-mercurial seed dressings followed, and in 1914 an entirely new field was opened with the discovery of organo-phosphates of high insecticidal effectiveness, including the first three systemic insecticides ever de-

Left, Friedrich Bayer, and right, Friedrich Weskott, co-founders of Farbenfabriken Bayer, A.G.

veloped. Growth in that field has been exceptional, and today the company ranks among the largest producers in the world.

In 1925 a number of German chemical companies were amalgamated under the name of I.G. Farbenindustrie. Not until 1951 was Farbenfabriken Bayer re-established as a separate entity. Since then the sharc capital has increased from DM1,000 to DM835 millions.

Since 1950 DM1,000 millions has

Since 1950 DM1,000 millions has been spent on research, DM145 millions in 1962 alone. More than 60 per cent. of present turnover is from products developed since 1948. They have been elaborated by over 2,000 scientists in more than 180 laboratories.

Intensive rebuilding and research programmes and increased turnover give the directors every confidence for the next 100 years. The United Kingdom subsidiary is FBA Pharmaceuticals, Ltd., Haywards Heath, Sussex.

Left: The original building of Farbenfabriken Bayer, A.G., in Barmen Rittershausen. Right: The company's new skyseraper in Leverkusen. Thirty-three stories high, it is at the moment the tallest office building in Germany.

Correspondence

Letters when received must bear the name and address of the sender, not necessarily for publication. The Editor does not hold himself responsible for the views expressed.

Response to an Appeal

SIR,—Thank you for the privilege of receiving space in your paper for an appeal for help for British Limbless Ex-Servicemen. I have received to date the sum of £4 2s., for which we are most grateful to the donors.

H. CAMPBELL, Secretary, CRIEFF CHEMISTS' ASSOC. Crieff, Perths

A Date Traced

SIR,—A few weeks ago THE CHEMIST AND DRUGGIST carried an interesting article on an old Cheltenham pharmacy. Mention was made of the original owner of the pharmacy, Russell Jeffrey, who died on "first day," but the date and year of his death appeared to be unknown. As a member of the Society of Friends I have access to the records at Friends House, and the Society's librarian has kindly supplied the missing information that Russell Jeffrey died at Cheltenham on January 12, 1867.

WILLIAM G. TORR, Exeter

Pharmaceutical Friends

SIR,—Friendship in pharmacy is a precious commodity. No doubt sensitivity as well as the law dictated the somewhat conciliatory terms used by the National Pharmaceutical Union in condemning a catchpenny sale promoted by a manufacturer. While we must have rejected the Rexall scheme with its conditional content and package-deal price of co-operation, we regret the naive omission of that company first to consult our representative body. The Marketing Policy Committee, committed to promote profitable co-operation, merits the attention of our friends in pharmacy and deserves our fullest support.

G. J. HENDRA, Truro, Cornwall

SIR, — I realise that Mr. T. A. Stockill cannot possibly be serious when he suggests that pharmacists should withdraw their support for Glaxo group products due to an alleged mistake by another member of the Group. As all pharmacists know, Glaxo are a ray of sunshine on the pharmaceutical horizon. They are real chemists' friends. They originated the credit scheme on price reductions, as compared with the "correct" procedure of our American allies. It is only by giving support to our real friends that we can hope to survive in these days of gimmicks and bally-

JOHN S. CLARKE, Weston-super-Mare

Profitability of Shop Space

SIR,—A certain make of baby foods was, in your July 20 issue, advertised thus: — "Make every foot of shelf-space work for you." In our shop, this brand occupies 9 sq. ft. of space, and we retail 462 tins per month. The ad-

vertisement mentions certain outlay and profit figures, from which I calculate the quantity of 8d. tins involved to be 1,290! AND, says the advertisement, "many shops sell this quantity and more—EVERY WEEK!" I should be interested to know if this is a misprint, or if the statement can be substantiated, and if so, how many of these "shops" are pharmacies? Incidentally, we stock a number of hair products that occupy a similar amount of space, and earn eighteen times as much — they "sell themselves," too!

A. ROBERTSON, London, S.W.11

Pharmacists' Public Image

SIR,—Under the above title in your issue of July 13 you give prominence and praise to the scheme promoted by Clinical Products, Ltd., for getting the backing of the retail chemist. Before we lose our sense of proportion let us think for a moment. The Nicholas group has not previously been noted for its concern for the chemist as the proper outlet for medicines or for the professional responsibility of its advertising. In your issue of June 29 there was a letter from the Bayer Products Co. complaining of Messrs. Nicholas' advertising methods in Northern Ireland. The advertisement to which they referred also appeared in this country in March (in the Guardian), and I wrote in protest to the Guardian and to the Pharmaceutical Society. The Guardian replied guardedly that the advertisement was not of their favourite kind. The Society has not yet got around to replying, but I have ceased to do business with Messrs. Aspro-Nicholas, or to show their products. To revert to Clinical Products, Ltd., we can obviously believe their statement that they will not allow retail distribution through other than registered chemists. What grocery store or supermarket would waste display space on such products? Messrs. Nicholas' tactics may be new, but there is no change of heart.

HUGH V. ROBERTS, Tenterden, Kent

Whose Side Are They On?

SIR,—The attitude of the Pharmaceutical Society, or at least of its official journal, as set out in the article "Penny Wise" (P.J.) must have given rise to some cynical comments in many quarters. Some weeks ago one of our multiple competitors had a 2-for-1 sale and an anniversary sale which did not appear to have aroused much comment from our "masters." Similarly, I am sure, the Rexall Drug Co. are not being frightened off by the comments of one or more chair-bound theoretical brains at Bloomsbury Square. At the same time, no doubt, if an individual chemist shop had attempted a 2-for-1 promotion sale, and the Society had received advance notice of it, the "boys" would have

been round at top speed to nail that rebel on the head. The multiples, of course, are too strong for the Society and they are, it would seem, left well alone! Retail pharmacists are businessmen first and foremost, and it is not up to the Society to tell its members how to sell goods other than ethical medicaments. The next move will be to issue lists of banned goods not allowed for sale in chemist shops and to follow it up with lightning swoops to see who is misbehaving. Everyone can see that the multiple chemists are thriving, both financially and as a public image because, amongst other things, they go in for so-called "garish advertising," as the Society likes to put it, and sell what they want from a sixpenny Elvis Presley photo to a £15 typewriter. I can't see that their dispensing service suffers in consequence.

MANUFACTURERS' ACTIVITIES

Introductions to a Product.—Universal Laboratories, Ltd., Ramsgate Road, Sandwich, Kent, recently concluded a series of trade conferences in Glasgow, Birmingham, Manchester, Leeds, London and Belfast to introduce their new slimming product Trimetts, During the series Mr. David Henry, M.P.S. (sales manager) and other senior executives met over 600 retail pharmacists.

Luxury Cruise.—Mr. D. M. Owen, M.P.S., Rye Road, Hoddesdon, Herts, wins two tickets on a seventeen-day cruise in October, calling at Italy, Greece, Lebanon, Syria and Cyprus, plus £100 in spending money, for supplying the successful entrant in a cruise competition organised by Richard Hudnut, Ltd., Eastleigh, Hants, among users of Style home perm kits.

Conference on Shaver Production.— Key executives of the international shaver division of the Remington Rand organisation met in Glasgow recently for a three-day exchange of production technology. Factory management policies were discussed and comparisons made of manufacturing processes employed by the company's shaver factorics throughout the world.

TONIC GIFT FOR STARVING CHILDREN: The Bishop of Southwark (Right Rev. A, M. Stockwood) receives from Mr. D. H. Pybus (Pybus, Westhead & Co., Ltd.) a consignment of 100 cases of Zestone children's vitamin tonic as a contribution to Oxfam (Oxford University's autumn campaign of hunger relief).

Medicines Among the Foods?

PHARMACISTS are sometimes accused of claiming a monopoly of the sales of medicines on the basis of services that are rated by the critics as illusory, or of exaggerated value, or even non-existent. Our strong belief is that it would be difficult for even the most commercially minded member of the Pharmaceutical Society to have become qualified and to be engaged in the practice of his calling without acquiring a powerful sense of responsibility. Some, it may be, do sell in circumstances in which others would withhold the sale, but all, in some degree, have become conditioned to think in terms of exercising judgment in supplying medicinal substances and in refusing them, if necessary, to unsuitable purchasers. It is to be noted, too, that the pharmaceutical conscience has been steadily if gradually evolving to higher levels under multiple pressures of events, of legislation, and of enjoinders from the Council of the Pharmaceutical Society. The machinery exists for disciplining the offender, and it is fully and fairly applied.

It is in the light of that situation that one must view the naked appeal to self-interest of some of those interests whose aim is to widen to the fullest extent the distribution of medicines. For example, we have been looking at a contemporary, the *Grocer's* "Review of Non-foods Merchandising." In the current issue of the periodical grocers are being encouraged to turn their minds to the merchandising of non-foods. The "nonfoods" are of various kinds—toiletries, paper goods, aerosols, stockings—but in particular one contributor writes on "The Place of Medicines in a Grocery Store." "Why," he asks, "should the retailer yield any of his highly precious space to these non-traditional lines; and, particularly, why should he set himself up as a form of dispensary and stock proprietary medicines?" He provides his own answer: "Basically, the reasons are twofold: 1, Service; 2, Profit" (service is explained as being the provision of facilities for a housewife to do all her weekly shopping under one roof). Under "profit" the writer of the article argues that lines on which the profit margin is substantial must be taken up in order to make good losses on "a great many" foods on which the profit margin "never very high, has sunk towards vanishing point-and, in many cases, below vanishing point." He does not explain what safeguards will operate to prevent margins on proprietary medicines going below vanishing point once

those goods are displayed, like all the others, on the shelves of the cut-price grocer. Instead, he makes the astonishing—and to our mind outrageous—claim that proprietary medicines "will continue to be lines worth stocking and promoting as long as Britain remains a nation of hypochondriacs."

To what sort of future are the methods of competition advocated by the Grocer reducing their readers and the community? "Grocers," states the editor of the supplement in a leading article, "have been the biggest poachers in industry—they have assimilated confectionery, greengrocery, meat, bread, fish, tobacco." If, having assimilated all those, they still must take up medicines to save them from "profits below vanishing point," the prospect is grim indeed, and unfortunately not for grocers alone. Chemists must, it seems, suffer in the process, and there is not even the situation, such as the Grocer's leader-writer describes, that "the reverse has also happened. The departmental and chain stores are opening food departments on an everincreasing scale." Pharmacists, one may point out, are not, and there seems no justification whatever for grocers' encroachment into the medicines field.

On the contrary, the distribution of proprietary medicines should, in the public interest, be handled in a way quite different from the selling of ordinary commercial merchandise.

Overseas Trade in Pharmaceuticals

Exports of medicinal and pharmaceutical products during June, as classified by the Board of Trade in division 54 of the Trade and Navigation Accounts, were valued at a little over £4.5 millions, bringing the total to £26.6 millions for the first half of the year. A comparison with last year's figures is not possible, because certain items that appeared in the 1962 list have been transferred to division 51 of the accounts (chemical elements and compounds) while others, such as surgical dressings, are now brought into the division's total. The value of a number of the more important pharmaceutical products—imports and exports—for the month of June are given in the accompanying tables.

Australia was the largest single customer for preparations within the division, the value of her purchases being £317,029, against £318,076 in May. New Zealand came next with £295,091, followed by the Irish Republic, £245,309, and Nigeria, £228,144. One or two items may still be compared, however, as for example bulk penicillin and its salts. At £210,000 they show a considerably higher value in June than in June 1962, and the total for

the six months, at a little over £1 million, compares with £755,000, in the corresponding period of 1962. Exports to the Common Market countries were valued at £471,000, and to the countries in the European Free Trade Association, including Finland (so far as can be ascertained from the figures) at £362,000.

Onward from Galen

SIDELINES OF CURRENT COMMENT

★ ENOUGH TO GIVE YOU THE PIP ★

"IT could be any modern dispensary," says a caption to a picture in Medical News illustrating an article "Army Psychiatry: A Quiet Revolution," "—except for the chevron on the sleeve of the dispenser. But it's all part of the well-organised facilities at Netley." For shame! In almost any other Army among the leading nations of the world the pharmacist would have been distinguished, not by the chevron of a "non-com" but by the pip of a commissioned

 \star ONE OF THE FACETS OF PHARMACEUTICAL PRACTICE \star "This is public relations at its best," says Bournemouth and District Branch News and Views in a special midsummer issue, of action taken by a Weymouth pharmacist resulting in the discovery of a Dangerous Drugs offence. "A Weymouth member," says the bulletin, "recently spotted one of his customers coming out of another pharmacy. A sixth sense caused him to investigate, and this revealed that dangerous drugs were being drawn from more than one source. The wheels were set in motion, I was notified, as were also all the chemists in the region. The local secretary of the British Medical Association was informed, and he contacted all Weymouth doctors. When the full facts were known the C.I.D. were called in. The patient is now in hospital and receiving treatment. Well done, Weymouth . . . for this prompt and humane act. It well illustrates one of the many facets of professional pharmaceutical practice which must be taken into account when calculations for our remuneration are made. deception might well have gone on for some time, it is pointed out. The prescriptions were genuine and in order except that the addresses were false. "It is undoubtedly an additional hazard in coastal holiday towns that the population is constantly on the move and false addresses are not easy to pick out." The "p.r. at its best" claim is no exaggeration.

★ GREETINGS TO A CENTENARIAN ★

From our vantage point of four years over the century we are happy to welcome a newcomer to the ranks of the centenarians—The Wine and Spirit Trade Review. We have a particular reason to do so from an early family connection. If a feature "About Ourselves" in its 224-p. centenary issue just published, the Review states "The

founder was Mr. William Reed . . . the youngest son of a Yorkshire farmer. His wife was the sister of the founders of Morgan Brothers, proprictors of The Ironmonger and THE CHEMIST AND DRUGGIST." Mrs. Rced, born Mary Anne Vaughan Morgan, was the only sister of the nine brothers whose story, "The Brothers Morgan," written by the late Sir Austin Hudson, Bt., M.P., was published privately in 1953. In that multiple biography Sir Austin wrote "The one daughter of this large family, Mary Anne, married a Mr. William Reed. In 1861, following on their success with The Ironmonger and The Chemist and Druggist, Morgan Brothers started another paper, The Grocer, in conjunction with their brother-in-law Reed. This paper was later passed to him as his sole property. The company which now owns The Grocer is William Reed, Ltd. They are also the proprietors of . . . The Wine and Spirit Trade Review." One way of introducing a Centenary number, as the Review's editor has written in "Journey Through a Century," might be to "get out the crystal ball and try to look ahead as far as 2063." Wisely he has renounced that course. That need not prevent us, unrelated as we have been for practically the whole of the first century, from expressing the wish that they will be publishing an equally attractive bicentenary number four years after our own.

MEDICAL ABSTRACTS

TRIAL OF A "FORMULA DIET"

A TWELVE-WEEKS trial of the use of a powdered food pre-paration (Metercal) in the treatment of "refractory obesity" has been carried out in Edinburgh by Drs. D. A. Seaton and L. J. P. Duncan (*Brit. med J.*, 1963. II. 219). Forty-six women, mostly middle-aged housewives, took part. All were clinically obese, and with one exception too heavy by at least 20 per cent. of their ideal weight; and none, during the previous year, had responded satisfactorily to a prescribed conventional diet containing 900-1,400 calories; they had not lost weight significantly in the three months before the trial; and were not known to have any cardiac disease, nor was there any clinical evidence of ædema. The patients were asked initially to try to eat nothing but the formula diet, but were allowed water and other non-calorific drinks to satisfy thirst. If they could not adhere to that regimen, they were allowed, in addition, small quantities of low-calorie foods. They were warned that constipation might occur, and were asked to take a simple aperient if necessary. The patients' weight, and the regimen followed, were ascertained at fortnightly intervals. Nine participants failed to complete the trial, but their results were included in those published, which showed that only ten patients had been able to adhere to the formula diet alone for the first two weeks. All but two had been taking prohibited foods by the end of ten weeks. Those who persisted with the formula diet alone, or supplemented it by permitted foods only, lost 2-3 lb. each week; when prohibited foods were eaten, weight loss more or less ceased. After eight weeks, the thirty-seven patients studied had lost an average of 11·1 lb. in weight, in contrast to 3·1 lb. in a comparable, earlier trial using diethylpropion, and 4·2 lb. using phenmetrazine, over the same period of time. Most patients had regained their original weights one year after the trial while on conventional subcalorie dicts. The authors considered that, because weight loss was greatest in the first few weeks, short-term therapy might be justified, though repeated courses might be necessary.

NEW BOOKS

Indian Pharmaceutical Guide, 1963

Pamposh Publications, E-38 Hauz Khas Enclave, New Delhi, 16, India. 10 x $7\frac{1}{2}$ in. Pp. 456. £3 plus postage. The guide is in four sections beginning with the development of the pharmaceutical industry in India and a chapter on the marketing of drugs there. Another chapter deals with the legal requirements. The second section (pp. 92) is a directory of "leading chemists and pharmaceutical distributors." The third and largest section (pp. 292) is a price list; and the final an alphabetical index to manufacturers and their products.

facts about feeding with Ostermilk

You have probably found that many young mothers ask your advice about suitable baby foods. When they do, you need have no hesitation in recommending Ostermilk renowned for its excellence and purity and backed by the experience of Glaxo Laboratories, world famous manufacturers of dietetic and pharmaceutical products.

nutritious Ostermilk

From the day a baby is born, Ostermilk can if necessary, supply its nutritional needs. For Ostermilk is not only made with premium grade milk from the finest herds, but has added iron for healthy blood and Vitamin D, to assist in the development of strong bones.

digestible Ostermilk

In the stomach Ostermilk behaves similarly to breast milk, it forms light flocculent curds making digestion easier.

GLAXO

pure Ostermilk

Ostermilk is pure. It is guaranteed tubercle-free and contains no harmful bacteria. Stringent purity tests are carried out at every stage of manufacture. These ensure that Ostermilk is completely safe.

Ostermilk is packed in attractive one pound cartons, and protected in three ways . . . contained in a heat sealed polythene bag, placed in a foil lined carton and wrapped in cellulose film. During manufacture and packing Ostermilk is untouched by hand, contamination being eliminated . . . Preparation is simplicity itself, following the instructions on the carton. Ostermilk is mixed with hot boiled water (not boiling) and is soon reconstituted into a rich, creamy milk, as fresh as the day it was made.

PACKS AND TRADE PRICES

1 doz. 1-lb cartons 43/-. 2 doz. or 3 doz. 1-lb cartons £2.0.3 per doz. 4 doz. 1-lb cartons or more £1.18.6 per doz. (Glaxo 'top-profit' parcels).

GLAXO LABORATORIES LIMITED

The name Ostermilk is a Glaxo trade mark

who have seborrhoeic dermatitis of the scalp

For the scalp-scratchers, shoulder-brushers and comb-clutterers, there's welcome relief with selsun Suspension. In clinical studies selsun effectively controlled 92 to 95 per cent of cases of common dandruff. It keeps the scalp free of scales for one to four weeks—relieves itching and burning after only two or three applications. Selsun is remarkably simple to apply and rinse out while washing the hair. It takes little time. No complicated procedures or messy ointments. In 1, 2 and 4 fluid ounce bottles with full directions for use on special label supplied on each bottle.

SELSUN (Selenium Sulphide, Abbott)

Centenary Conference Papers

DETAILS OF CONTRIBUTIONS TO SCIENCE AND PROFESSIONAL SESSIONS

THE following papers are being presented at the British Pharmaceutical Conference, London, September 2-6.

It is hoped that preprints of the science papers and the opening papers of the symposium and professional sessions will be available during the third week of August and will be sent to those members of the Conference who request them on the "Preprint Request" card which was enclosed with the receipt for payment for the Conference tickets. Those cards should be sent to the secretaries, 17 Bloomsbury Square, London, W.C.1, not later than August 16.

Monday morning, September 2 **OPENING SESSION**

"THE BRITISH PHARMACEUTICAL CON-FERENCE, 1863–1963." H. G. Rolfe (chairman of the Conference).

Monday afternoon, September 2 SCIENCE SESSION Group A

A QUANTITATIVE CHROMATOGRA-PHIC METHOD FOR THE DETERMINATION OF PURITY OF GRISEOFULVIN, A. Holbrook, F. Bailey and Greta M. Bailey.

Friday afternoon, September 6 SCIENCE SESSION

THE MITRAGYNA SPECIES OF GHANA, THE ANATOMY OF THE LEAVES OF Mitragyna stipulosa (D.C.) O. KUNTZE AND Mitragyna ciliata, Aubr. et Pellegr. Parirokh Shadan and E. J.

34. THE STRUCTURE OF CASCARO-SIDES A AND B. J. W. Fairbairn, C. A. Friedmann and S. Simic.

35. A New Method of Streptomy-CIN CHROMATOGRAPHY AND ITS USE IN THE EXAMINATION OF THE REACTION BE-TWEEN STREPTOMYCIN AND AMMONIA. T. E. Couling and R. Goodey.

EXPANSION PLANS

IMPERIAL Chemical Industries, Ltd., and the Celanese Corporation of America are forming a new joint company, intended to be named Nalcon, Ltd., to manufacture the American company's acetal copolymer (a new plastic of primary interest as a replacement for metals). The new company will be owned 59 per cent. by I.C.I. and 41 per cent. by the Celanese Corporation.

A MAJOR increase in polystyrene capacity by Distrene, Ltd. (a company in Distillers Chemicals and Plastics group), will result from expanded manufacturing facilities at the company's Barry, South Wales, plant. Total capacity will be increased by 40 per cent. to 17,500 tons, and the new facilities—which comprise new polymerisa-tion and colouring capacity—will be on stream in September. Distrene, Ltd., is jointly owned by Distillers Co. and the Dow Chemical Co., U.S.A., and is shortly to become a 50/50 company, manufacturing polystyrene by the process developed by Messrs. Dow.

TRADE REPORT

The prices given are those obtained by importers or manufacturers for bulk quantities or original packages. Various charges have to be added whereby values are in many instances augmented before wholesale dealers receive the goods into stock. Crude drugs and essential oils vary greatly in quality and higher prices are charged for selected qualities.

LONDON, JULY 31: Call for CRUDE DRUGS during the week was negligible and prices for the most part were unchanged.

GUM ACACIA continued to firm at origin, shippers' offers being up by 1s. 6d. per cwt. Peppers were down slightly but GINGERS remained a firm market. FENUGREEK SEED was slightly easier for new crop.

Among ESSENTIAL OILS, Ceylon CITRONELLA was easier on the spot and for shipment. LEMONGRASS from origin was down by three-halfpence per lb., but East Indian SANDALWOOD was 2s. 6d. dearer, c.i.f.

The long-awaited reduction in the export tax on OLIVE OIL was announced during the week. Offers at the reduced rate range from £301 10s. to £310 per metric ton, f.o.b., which should make the landed duty-paid value 28s, 6d, to 30s, per gall. Export licences have not yet been issued in Spain and, with the various formalities and time for transit, oil at the lower rates cannot be expected to arrive before the end of August.

In PHARMACEUTICAL CHEMICALS new rates for the main 10DIDES and RE-SUBLIMED IODINE were announced following last week's announcement that crude iodine was advanced. Potassium iodide is dearer by 3s. 9d. per kilo and the sodium salt by 4s. 3d. Physostig-MINE is short and makers have advanced their schedules. Also dearer were OLEIC ACID by fivepence per gall. (£5 per ton) and light CALCIUM CARBONATE by 50s. per ton.

Pharmaceutical Chemicals

ALUMINIUM SULPHATE.—B.P.C. in 1-cwt. sacks, 1s. 9d. per 1b.

CHARCOAL. — Medicinal activated, B.P.C. in I-cwt. lots, £22 10s. per cwt.

IODIDES. — (Per kilo). Potassium, 50-kilo lots, 23s.; SODIUM, 28s. 6d. for 25kilo lots, ammonium, 44s.

IODINE.—Resublimed in less than 50-kilo lots, 30s. 6d. per kilo; 50-kilos and over, 29s. 9d. Minimum delivered rate for CRUDE is 18s. 7d. per kilo.

IODOFORM.—Powder (per kilo), in 50-kilo lots; less than 50-kilos, 53s. Crystals are 3s. per lb. more.

1soprenaline sulphate.—One-kilo lots, 530s. pcr kilo; 5-kilos, 510s. per kilo.

Mandelic acid.—One-cwt. lots, 12s. 6d. per lb. Calcium salt also 12s. 6d. Sodium mandelate, 13s. and Ammonium mandelate 50 per ccnt. solution, 7s. 6d.

MENAPHTHONE. — (One-kilo lots). B.P. 140s. pcr kilo; ACETOMENAPHTHONE, B.P., 140s.; WATER-SOLUBLE (menadione sodium bisulphite, U.S.P.), 105s.

MERCURY DERIVATIVES.—Pcr kilo, under 50-kilo lots—AMMONIATED MERCURY, B.P., lump or powder, 53s. 3d.; PERCHLORIDE, B.P.C., powder, 45s. 6d.; SUBCHLORIDE, (calomel), B.P.C., 52s. 3d.; OXIDES, yellow, B.P., 55s.; red B.P.C., 1949, 56s. 3d.

PHENACETIN.—B.P. one-ton lots, 6s. 3d. per lb.; 1-cwt., 6s. 9d.

PHENOLPHTIIALEIN.—One-cwt. 9s. per 1b. PILOCARPINE.—In 1-kilo lots prices are: HYDROCHILORIDE, 1,375s. per kilo; NITRATE 1,128s.

PIPERAZINE.—(50-kilo lots), ADIPATE, 22s per kilo; Citrate, 20s. 6d.; Hexahydrate, 17s.; Phosphate, 23s.; Tartrate, 22s. 6d.

Crude Drugs

Benzoin.—Sumatra block, spot £18 10s. to £35 per cwt. as to quality.

BUCHU.—Spot, 4s. per lb.; shipment, 3s. $10\frac{1}{2}$ d., c.i.f.

Calamus.—Root, 100s. per cwt., spot. 87s. 6d., c.i.f.

CALUMBA ROOT.—Mozambique in bond, 85s. per cwt.

Camphor. — B.P. powder nominally 4s. 9d. per lb. in bond. No c.i.f. offers.

Capsicums. — East African on stalk, 150s. per cwt.; Ethiopian, 145s.

Cardamoms.—Aleppy greens, 10s. spot; shipment 10s., c.i.f., nominal. Seeds, spot 13s. 6d.; shipment 12s. 3d., c.i.f.

CASCARA.—Spot, 260s. per cwt.; offers of new peel for shipment have been withdrawn.

COCHINEAL. — Canary Isle black-brilliant nominal; silver-grey 16s. per lb., landed. Peruvian nominal.

GINGER,—(Per cwt.) African, spot about 380s. Jamaican No. 3 spot, about 750s.; shipment, nominal. Cochin, 285s.; shipment, 270s., c.i.f.

GUM ACACIA. — Kordofan-cleaned sorts, 157s. 6d. per cwt., spot; September shipment, 144s., c.i.f.

JUNIPER BERRIES.—Hungarian, 95s. per cwt.; German, 145s, spot.

KARAYA. — No. 1 gum, spot nominal; No. 2, 325s. per cwt.

LANOLIN. — ANHYDROUS B.P. is from 170s. to 190s. per cwt. in 1-ton lots delivered free drums.

LEMON PEEL.—Spot, 2s. 3d. per lb.

Linseed. — Whole, 72s. 6d. per cwt.; crushed, 102s. 6d.

LIQUORICE. — Natural root: Russian, 65s. per cwt.; Anatolian, 57s. 6d.; Persian, 52s. 6d.; Sicilian 1-kilo bundles, 1s. 6d. per lb. Block juice: Anatolian 210s. per cwt.; Italian stick from 329s. to 470s. per

Nux vomica.—Cochin, 75s. per cwt. on the spot.

PEPPER.—White Sarawak spot, 2s. 11d. per lb.; shipment, 2s, 8½d., c.i.f. Black Sarawak spot, 2s. 3½d.; shipment, 1s. 11d. Black Malabar, 320s, per cwt. spot; shipment, 267s. 6d., e.i.f.

SEEDS. — (Per cwt.) ANISE. — Spanish, 275s., duty paid. Caraway. — Dutch, 154s., duty paid. Celery.—Indian on spot quoted at 195s.; July-August shipment, 142s 6d., c.i.f. Coriander. — Moroccan quoted at 195s.; July-August shipment, 142s 6d., c.i.f. Coriander. — Moroccan selling at 62s. 6d., duty paid; new crop, August shipment, offered at 58s., c.i.f. Cumin. — Cyprian, 170s.; Indian, 165s.; Iranian, 160s., duty paid; shipment Iranian, 142s., c.i.f. Dill.—Indian quoted at 80s., spot; shipment, 57s. 6d., c.i.f. Fennel.—Indian is 125s., spot; shipment old crop, 105s., c.i.f; new crop, 110s., c.i.f. Fenugreek.—Moroeean, 54s., duty paid; new crop for August shipment, a little easier at 42s. 6d., c.i.f. Mustard.—English, 50s. to 75s., according to quality.

Tragacanth, — No, 1 ribbon about

Tragacanth. — No. 1 ribbon about £150 per cwt. No. 2, £140, spot.

Waxes.— (Per cwt).: Bees'.—Dar-es-Salaam, spot, 445s.; shipment, 427s. 6d., c.i.f. Abyssinian, spot, 390s., in bond; shipment, 385s., c.i.f. Candelilla, spot, 465s.; forward, 460s landed. Carnauba, fatty grey, spot, 290s., shipment, 270s., c.i f.; prime yellow, spot, 815s.; shipment, 790s., c.i.f.

Essential and Expressed Oils

Almond. — Sweet, English expressed, 9s. 6d. per lb.; foreign, 7s.

AMBER.—Rectified on the spot, 1s. 6d. per lb.

ANISE. - Chinese, 18s. 3d. per lb., spot; shipment, 18s., c.i.f.

Bois DE ROSE.—Brazilian, 24s. 6d. per lb. on the spot: August shipment, 22s. 3d., c.i.f.

CADE. — Spanish, 2s. 6d. per lb. for drum lots.

CAJUPUT.—Spot, from 10s. per lb.

CALAMUS. — Spot, about 56s. per lb.; shipment, 38s. per lb., c.i.f.

CAMPHOR, WHITE. — Chinese, 2s. 7d. duty paid, per lb.; shipment, 1s. 9d., c.i.f.

Cananga.—Spot, 27s. per lb.

CARAWAY.—Imported oil, 34s. per lb.

CARDAMOM.—Indian from 260s. to 275s. per lb., spot.

Castor.—Home produced B.P. oil, spot, £131 per ton naked ex mill (2-ton lots).

CEDARWOOD. — Reetified 6s. per lb. on the spot.

CITRONELLA. — Ceylon spot, 9s. 3d.; shipment 8s. 10d. per lb., c.i.f. Formosan, 12s. 3d., in bond; August shipment, 9s. 10½d., c.i.f. Chinese, spot cleared; August shipment, 10s. 6d., c.i.f., nominal.

CUBEB.—Spot supplies of imported are 85s. per lb.

Grapefruit.—Spot offers from 18s. per

LEMON. — Spot Sicilian 52s, 6d, per lb.; shipment nominally 53s, per lb., c.i.f.

LEMONGRASS. — Spot, 11s. 3d. per lb.; shipment, 11s. 1½d., c.i.f

OLIVE.—Export tax on Spanish oil has been reduced. F.o.b. offers are from £301 10s. to £310 per metric ton as to quality. Landed duty-paid value 28s. 6d. to 30s. per gall. early September. Spot African, 44s. per gall.

PALMAROSA.—Shipment, 62s. 6d. per lb., c.i.f.; spot 70s.

PIMENTO. — English-distilled berry from 150s. per lb. Rectified leaf, 19s. 6d. per

SANDALWOOD. — Spot Mysore, 107s. 6d., per lb.; forward, East Indian, 107s. 6d.,

SASSAFRAS. — Brazilian is from 2s. 6d. per lb., duty paid.

SPEARMINT.—American oil on the spot, 26s. per 1b.

TANGERINE.—Sicilian about 70s. per 1b. spot. Floridan for shipment, 24s. to 25s.,

VETIVERT.—Bourbon spot, 85s. to 105s. per lb.; shipment, 95s., c.i.f.

YLANG-YLANG. - Best oil quoted about 145s. per lb.

UNITED STATES REPORT

NEW YORK, JULY 30: Crude IODINE was boosted eight cents to a new level of \$1.18 per lb. Rhubarb advanced five cents to 35 cents per lb., and purified Papain rose 50 cents to \$4.75. Lower per lb. among CRUDE DRUGS were Tolu Balsam at \$4.50, down 30 cents; and WITCH HAZEL LEAVES at 30 cents, down two cents, SPEARMINT OIL rose 10 cents to \$3.35 per lb, and CARA-WAY advanced 15 cents to \$4. Resale U.S.P. grade LEMON eased to \$9.25, down 50 cents per lb.

BRANCH EVENTS

ENFIELD

Display of Pharmacy Jars

An address on "Old Pharmacy Jars," illustrated by his own collection, was given by MR. G. F. GARBUTT at the annual meeting of the Enfield Chemists' Association recently. Mr. Garbutt's favourite jars were the Spanish and Italian type known as "maiolica" made between the years 1400 and 1800, although the finest had been produced about 1520. They were covered with a white opaque enamel containing oxide of tin, lead oxide and potassium silicate. After being turned on a wheel and kiln fired to produce a buff coloured vessel, they were dipped into the enamel mix-ture and allowed to dry. The artist painted this whitish surface with bright colours made from the oxides of cobalt (blue), iron (orange), antimony (yellow), copper (green) and manganese (brown). The pot was then fired a second time and a hard enamel formed in which the colours were permanent and did not fade, even after centuries of exposure to sunlight. The enamel being expensive many pots were not enamelled on the bottom or the inside. Discussing the various shapes of pot and their uses, the speaker said that for solids and semi-solids jars known as an "albarello" were used. The shape was

cylindrical, with a slight waist making them easier to hold; some had lids, but many were closed by parchment. The spouted pot, shaped rather like a teapot, was used for syrups, honeys and fixed oils; they were not practical because insects would creep in under the parchment cover. The globular flask or high-necked flask was used to store thin liquids such as medicated waters. answer to a question, Mr. Garbutt said that one could always purchase beautishops, had cost only a few pounds. Recognition of the source of a pot came with experience. In general English pots were blue and white with large decoration, while Dutch had smaller decoration and were often fitted with brass lids. Spanish jars tended to have high collars and the name of the drug, or a space for a paper label, low down. A shield type decoration was common on these jars. Two other members of the Branch, Messrs, R. J. Mellowes and S. Wadsworth brought their own collec-

WORLD TRADE

Holland's Chemical Industry Expands. — Total turnover of Holland's chemical industry in 1962 amounted to fl. 3,500 millions, against fl. 3,250 millions (adjusted) in 1961. In terms of

ful jars if one had sufficient capital, but most of his own, obtained from antique tions and displayed them to the meeting.

WILLS

sales, the chemical industry was Hol-

land's third largest industrial sector. Sales of pharmaceuticals were valued at fl. 324 millions (fl. 314 millions), of

which exports were at fl. 196 millions

are reported by the German Chemical

Industry Association's monthly bulletin. Exports rose by nearly 25 per cent.

over the April level and brought the total value for the first five months of

the year to DM3,150 millions-10·1

per cent. more than in the corresponding period of 1962. In the first four months the increase had amounted to

only 6.5 per cent. Exports of photo-

graphic chemicals jumped by 16 per cent, to DM88 millions and those of

pharmaceuticals by 7·3 per cent, to DM317 millions. The chemical industry accounted for 13·9 per cent, of West

Germany's total exports during the first

five months of the year.

West German Chemicals.—Increases "by leaps and bounds" in West Germany's chemical exports during May

(fl. 179 millions).

MR. S. BARKER, M.P.S., Ganarew House, Ganarew, Herefords, left £54,711 (£52,557 net). MR. B. FOGGITT, M.P.S., South Vil'a, Bagby, near Thirsk, Yorks, left £24,914 (£24,683 net).

MR. W. E. HUMPHREYS, M.P.S., 177 Rose ane, Mossley Hill, Liverpool, left £18,604

(£18,510 net).

MR. J. E. OWEN, M.P.S., Hillcrest, Green Lane, Vicars Cross, Chester, left £45,806 (£45,238)

MR. F. PENFOLD, M.P.S., 120 Cromwell Road, St. Andrews, Bristol, left £71,843 (£71,666 net). MR. H. A. SCHOLES, M.P.S., 59A Cable Road, Hoylake, Cheshire, left £7,077 (£7,009 net).

MR. L. S. SELLE, M.P.S., 2 Westcott Street, Hull, Yorks, left £16,990 (£16,890 net).

MR. L. H. TEARE, M.P.S., 11 St. Lawrence House, Manor Close, Edgbaston, Birmingham,

left £31,201 (£30,814 net).

MR. A. YOUNG, M.P.S., 19 St. John's Road,
Cosham, Hants, left £20,027 (£19,971 net).

Geigy

We are proud to present Pharmacists with the opportunity of joining our outstanding representative force.

Hard work, initiative and enthusiasm will be expected, appreciated and rewarded. If you are capable of achieving a high level performance then it is as "Mr. Geigy" that we would say your future is most fully assured.

Initially we would offer you an intensive training course covering all facets of a representative's work. The course is an integration of two vigorous departments—your own professional service department and a research-minded medical department. By the time you make your first call on a doctor you will be confident and competent as a result of the "Training Strength" supporting you at Wythenshawe. Our International Research Organisation is the security of your future. The discovery of Tofranil for the treatment of depression and the discovery of Hygroton bringing a new concept to diuretic therapy, are but two of our major contributions to modern therapeutics. At your interview you will find our assessment intimately concerned with your character and warmth of personality. Generous starting salary, company car and expense arrangements. Naturally, we also have an excellent pension scheme and all other conditions of service are top-class.

Ask your "Mr. Geigy" about the organisation behind him. Vacancies are available in the U.K. for a training course starting in November 1963.

Please send full particulars of your career to date to:

Director of Promotion, Geigy Pharmaceutical Company, Ltd., Roundthorn Estate, Wythenshawe, Manchester, 23

Technical Books for the Pharmacist's Library...

PHARMACEUTICAL FORMULAS, Vol. 1 12th Edition, 1953

SHORT of possessing a whole series of national pharmacopæias, the pharmacist has at his hands in this volume the best means of comparing the standards and formulas official in the pharmacopæias of the principle countries of the world, plus a host of other formulations of galenical products, many of which would nowadays be extremely difficult to find were they not assembled in this unique and fully indexed volume of 1,139 pages, issued with a 60-pp. supplement.

PHARMACEUTICAL FORMULAS, 11th Edition

A BOOK no chemist can afford to be without. Although conditions in retail pharmacy have changed so much in recent years, a source book of formulas of toilet, cosmetic and perfumery preparations, adhesives, beverages, varnishes and lacquers, horticultural and pesticidal products, household cleansers and polishes, etc., remains an indispensable book of reference for the chemist whose retail customers come to him as the practical expert. It would be fair to claim an international reputation for this unrivalled collection of recipes totalling nearly 900 pages.

Price £2 2s. 0d. Postage 2s. 3d.

If Pharmaceutical Formulas Volumes 1 and 2 are ordered together the combined cost is reduced to £3 17s. 6d. Postage 3s.

CHEMIST'S DICTIONARY OF SYNONYMS

An invaluable—indeed indispensable—handbook at the counter and in the dispensary, providing the answers to many otherwise awkward requests by customers. Incorporates the best of the former "Rouse's Synonyms."

Price 8s. 6d. Postage 7d.

PHARMACEUTICAL EMULSIONS AND EMULSIFYING AGENTS

New edition in course of preparation. One of the most thumbed volumes in libraries used by pharmaceutical students, this compact handbook is essentially practical and informative, giving the modern scientific basis of the acquired skills and knowledge of generations of practising pharmacists. The much chlarged index reflects the ever-growing availability and use of proprietary emulsifying agents.

ESSENTIALS OF TREATMENT

1st Edition, 1956

A most concise guide to modern medical outlooks on many commonly encountered diseases and conditions, showing the place of the newer remedies among those of longer establishment, and discussing the relative merits of medical, surgical and nursing techniques.

Price 17s. 6d. Postage 9d.

CHEMIST'S DICTIONARY OF MEDICAL TERMS 7th Edition

More than ever the pharmacist, called upon almost daily to give information to medical practitioners about new proprietary medicines, needs to be familiar with the vocabulary of modern medicine. The DICTIONARY is, of course, equally invaluable to pharmaceutical manufacturers, medical representatives, persons engaged in professions ancillary to medicine, medical copywriters, etc.

Price 17s. 6d. Postage 9d.

THE PHARMACY OF SILICONES AND THEIR USES IN MEDICINE

1st Edition, 1958

By RONALD LEVIN, F.P.S.

THE silicones are a group of compounds of growing importance. To the pharmacist, engaged in whatever sphere, this book provides both interest and enlightenment. The author has taken extreme care to tap all available sources of information on the subject, and gives his readers the benefit of his findings. There is also an extensive bibliography.

Price 15s. 0d. Postage 8d.

TABLET TALK

The Manesty range of Coating Pans will deal with any type of tablet core, in any quantity. They are available as fixed speed or variable speed models and can be fitted with hot air blowers. The largest machine in the range is model LCPI. This has a pan of 5' 6" in diameter and will handle coated tablets up to 560 lbs. The CP2 is a smaller model for pans of 30"/42" diameter. It embodies a specially designed stand and incorporates a new type of gearing and lubrication. The CP3 model is designed, essentially, as an inexpensive machine and this too for pans 30"/42" diameter. The BCP2 is a Bench Coating Pan and is extremely useful for coating small

batches of tablets and for experimental work. This machine is available with constant or variable speed motor drive and has a 16" pan. We are always pleased to offer advice on any coating problems and will recommend the machine ideally suited to your requirements. Why not write for full details of the Manesty range?

> See us at the INTERNATIONAL PACKAGING EXHIBITION Olympia 4th-12th September 1963 STAND BLUE 97 GRAND HALL.
